PRESENTATION

Colombian National Police (CNP) is glad to present to the national and international opinion this annual comparative report, which contains criminal statistics regarding all offenses having social impact nationwide, as well as the most significant achievements reached by CNP during 2005, compared to 2004 figures.

The information contained in this report contributes to identify the basic characteristics of crime such as trends, volume, rates, most affected zones and victims among other variables, in order to analyze them and advice for making better decisions that involve preventing and controlling activities whose aim is to reduce crime and violence, and to reduce incentives for criminal acts. It is also oriented to contribute to the entrepreneurs, for them to know a real Colombian and current situation, supplying them useful information that could provide economic growth in our country.

The first part of the study is related to offenses having social impact, which includes the analysis of twelve different types of offenses and their variables. The second part is focused in the operative achievements reached by CNP, including items such as arrests for all crimes, recovered and seized merchandise, drugs and cars, as well as information about expropriation, as a result of the government's struggle against illicit drugs.

All the efforts of the CNP are oriented to guarantee dignified life conditions and a peaceful coexistence among citizens, aims that are difficult to reach, if there is prevalence of domestic and social violence in the country, which represents a major obstacle to economic and social development, as it hinders growth, aggravates poverty, generates a climate of fear among citizens and presents difficult challenges for democratic governance and peaceful coexistence in our country.

We recognize the huge contribution of the Military Forces, citizens, and the industrial groups that in a progressive way have bonded to the fight against crime, through several actions that support and complement CNP efforts carried out to control delinquency, with the true conviction that just through this joint and coordinated effort, Colombians are going to eventually have the country we have envisioned.

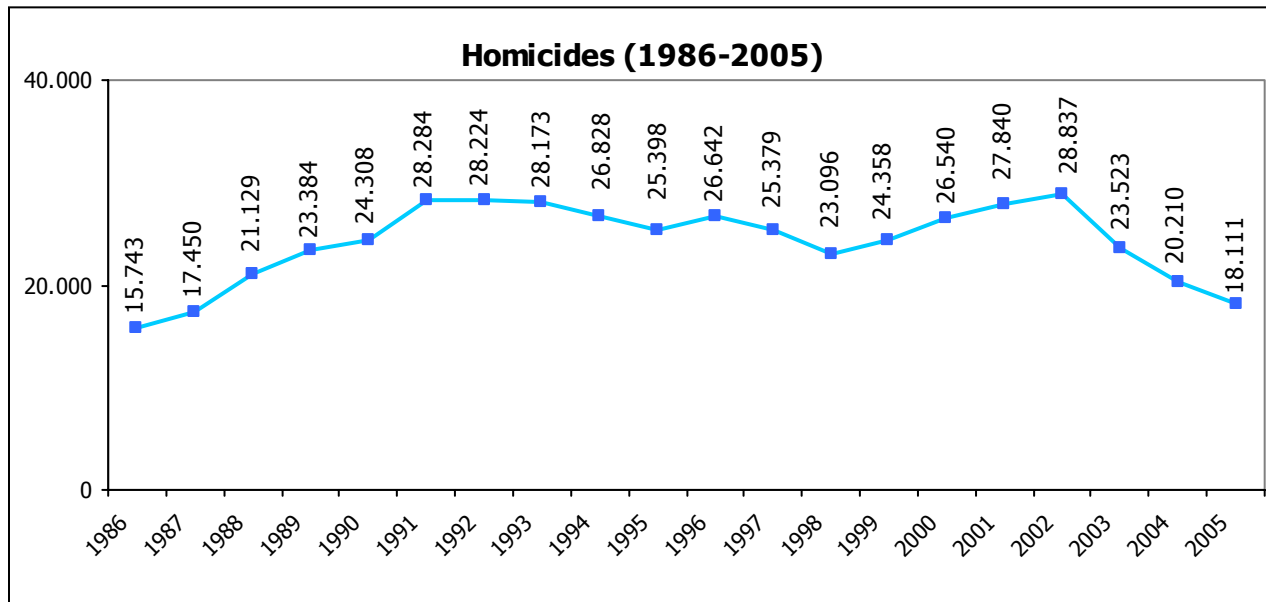

The Colombian National Police confirms its commitment with the country in order to consolidate safer environments, where social and economic sustainable development is possible.

Brigadier General **OSCAR ADOLFO NARANJO TRUJILLO**
Judicial Police Director CNP

I. HOMICIDES

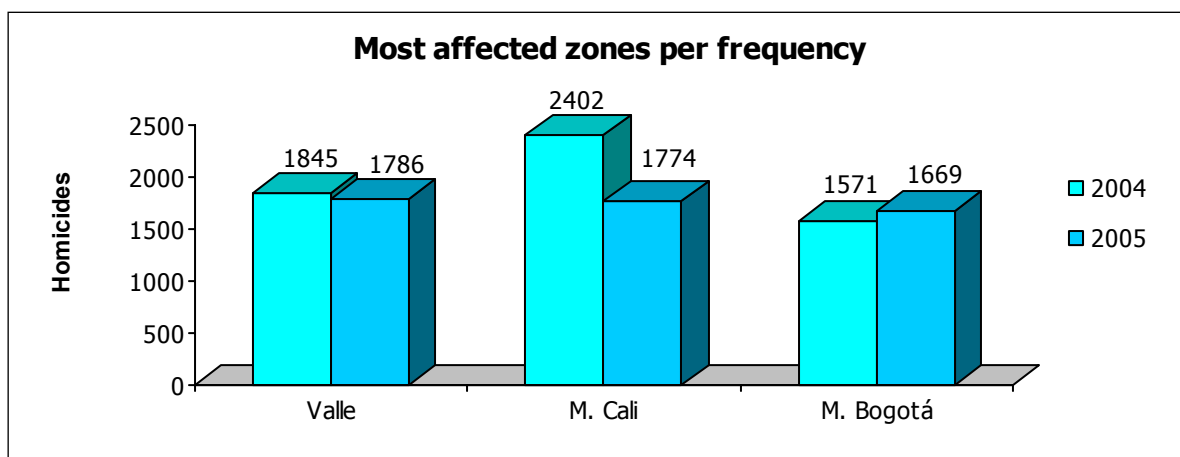

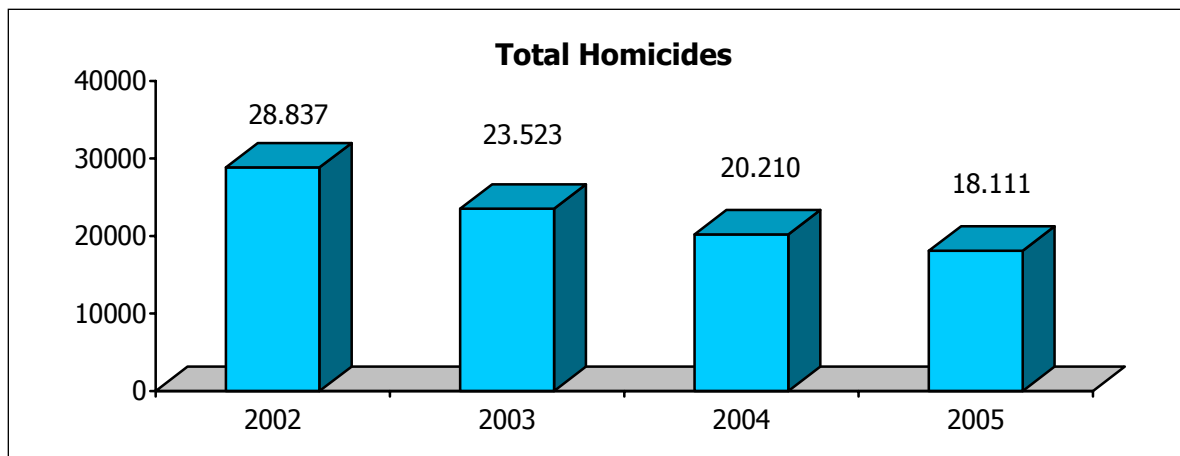

National volume, trends and rates.

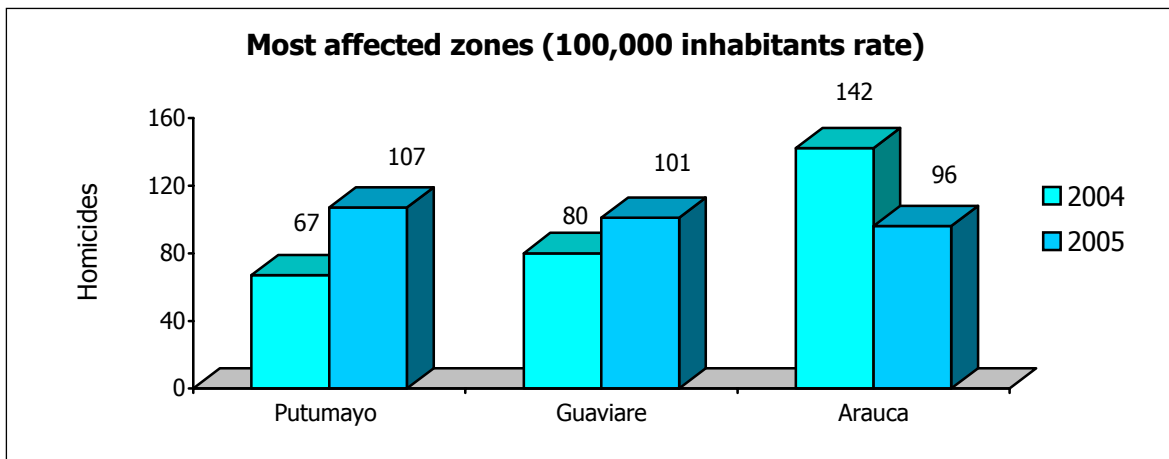

In 2005, occurrences of this offense decreased 10% compared with the 2004 number, down from 20.210 to 18.111 offenses, which means 2.099 fewer homicides. The 2005 data also showed a decline in the rate per 100.000 inhabitants, falling from 45 in 2004 to 39 in 2005.

When looking at each month individually, May and December showed the highest peaks with 1.581 and 1.603 cases, while February showed the lowest one. Besides, 189 police officers were killed while on duty during 2005, which means 66 more than in 2004.

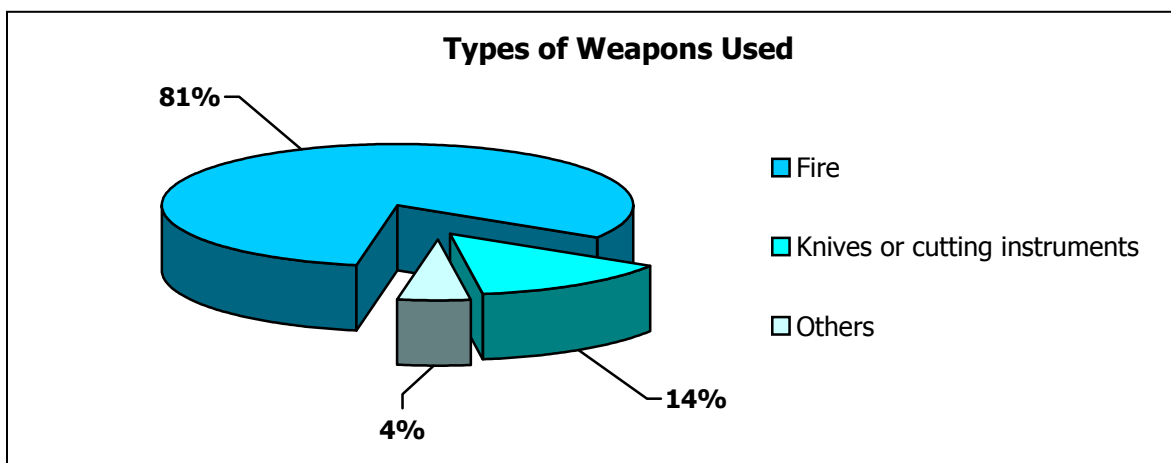

The 2005 data showed a significant 37% decrease while comparing to the 2002 data, falling from 28.837 homicides in 2002, to 18.111 cases in 2005.

Although the Valle province and Metropolitan Areas (M) of Cali and Bogotá were the most affected zones during 2005, with 1.786, 1.774 and 1.669 homicides respectively, the 2005 data showed a reduction in the total number of homicides in Valle province and the Metropolitan Area of Cali, when comparing it with 2004. The most significant drop was reported in the Metropolitan area of Cali (26%), falling from 2.402 cases to 1.774, which means 628 lesser homicides.

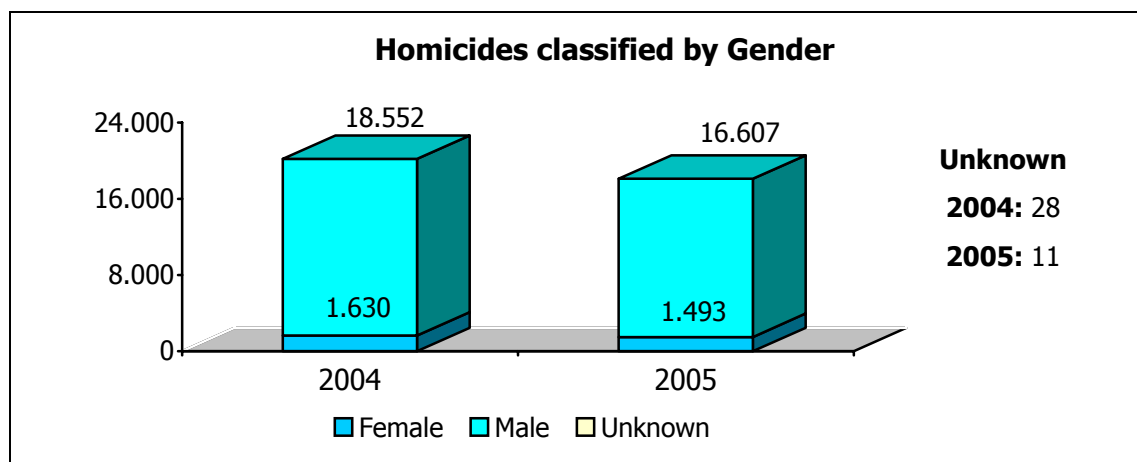

During 2005 Putumayo province was the most affected zone according to the rate per 100.000 inhabitants with 107 victims, 40 more than those in the previous year, followed by Guaviare province with 101 victims and Arauca province which showed a decrease of 32% while comparing with the 2004, falling from 142 to 96 cases.

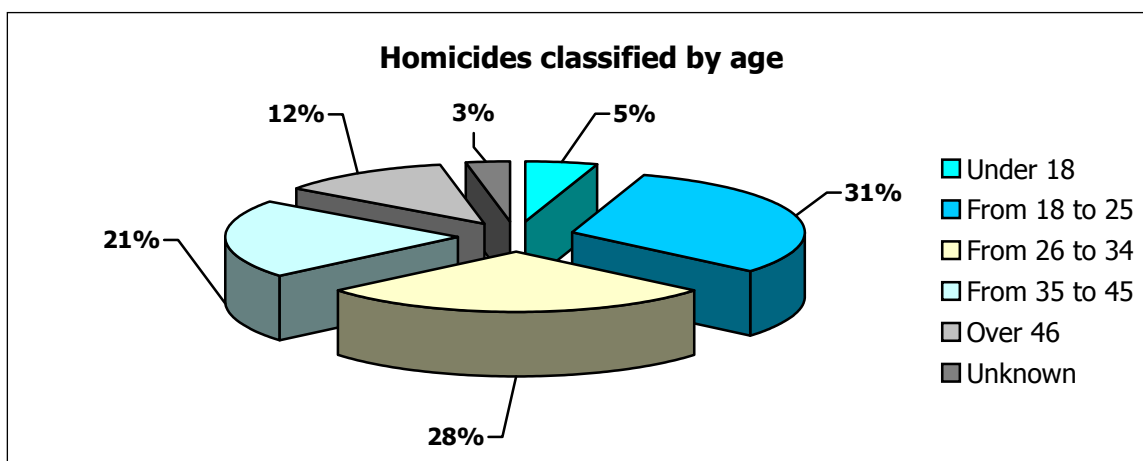

During the year 2005, 81% of the homicides were committed with firearms and 14% with knives or cutting instruments; the remaining 5% of the offenses were committed with other weapons such as clubs, blunt objects, among others.

According to the graphs on the previous page, the 2005 data showed that 92% of the homicides corresponded to male victims and 8% to female victims, the same proportion that was reported during 2004. In absolute terms, this equals to 1.493 female victims and 16.607 male victims in 2005.

While comparing 2005 data to 2004, there was a reduction of 1.945 male victims and there were 137 fewer female victims during the 2005 year.

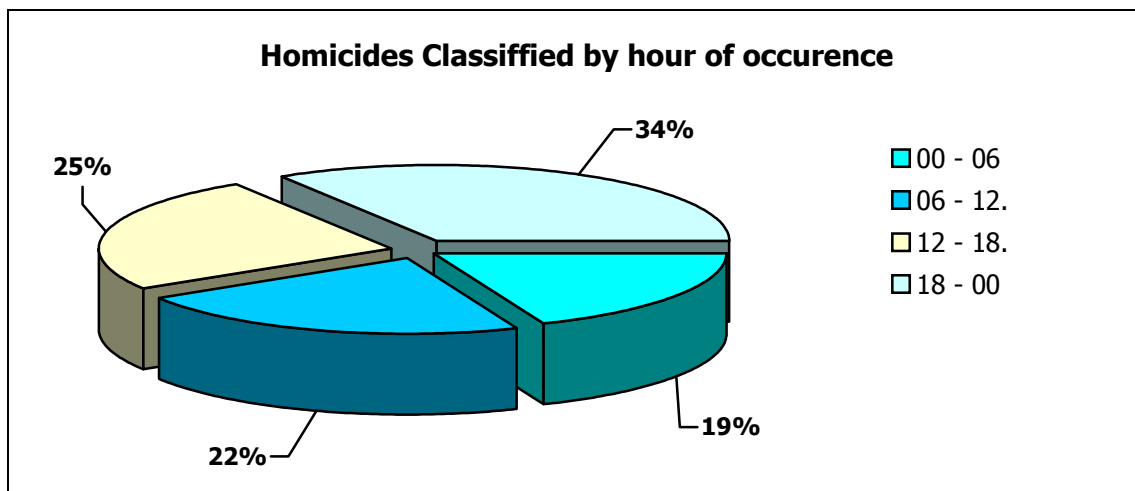

Classifying by age, the largest amount of homicides during 2005 corresponded to people whose age was rated from 18 to 25, which equals to 31% or 5.630 offenses. The second place was found on people whose age was rated from 26 to 34, which equals to 28%. The fewest number of homicides was reported on population under 18 years old, which corresponded to 5% or 923 cases.

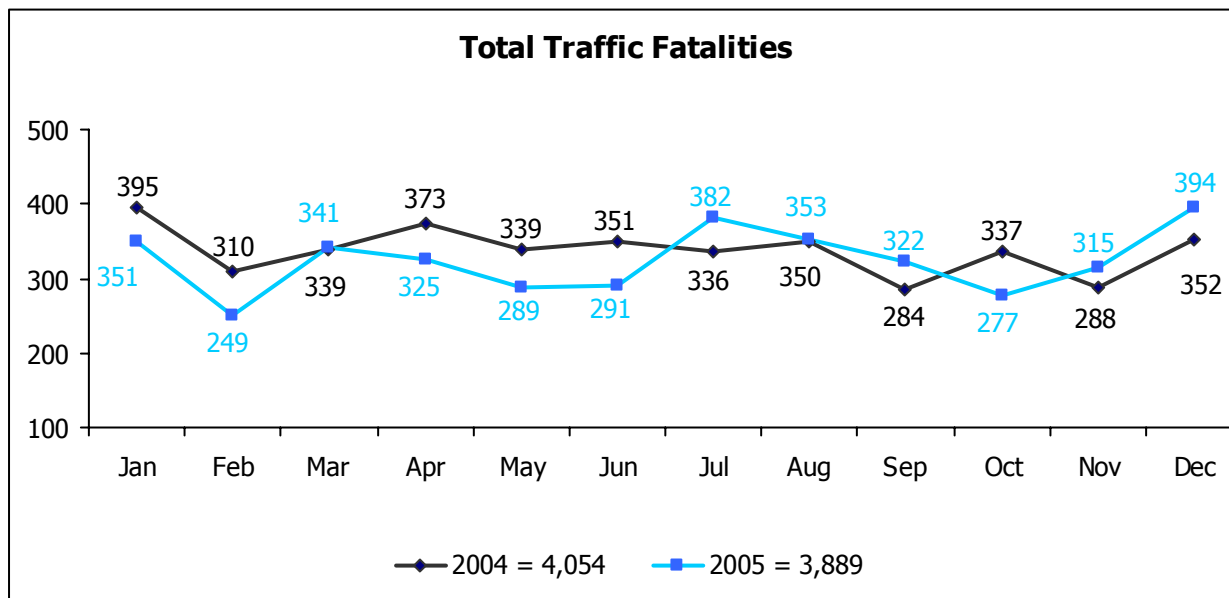

The figures reported in this chart show that in 2005, 34% of the offenses occurred from 6:00 p.m. until midnight, with a total of 6.089 cases, repeating the same pattern that occurred in the previous year. The least amount of homicides took place from midnight

until 6:00 a.m. with 19% or 3.507 cases in 2005 which equals to 20 fewer cases than those occurred in 2004.

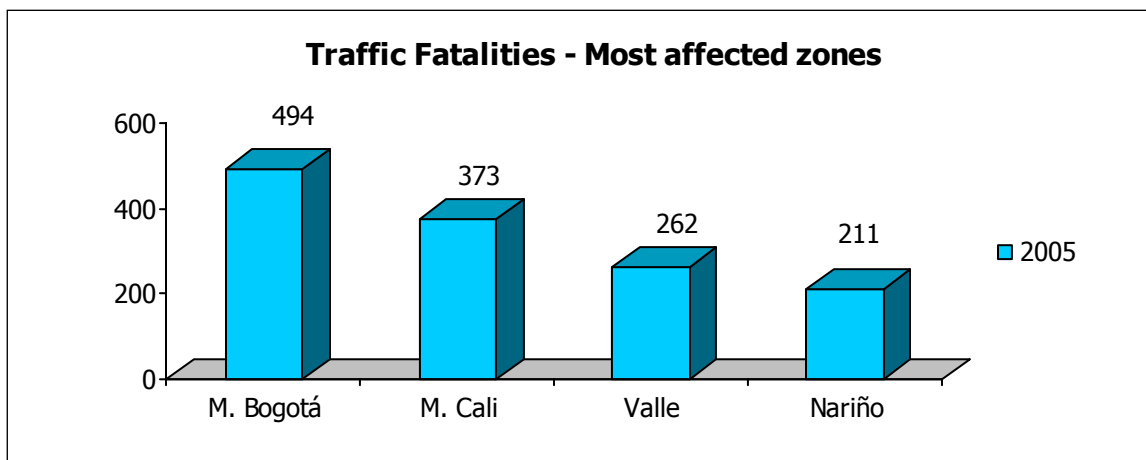

II. TRAFFIC FATALITIES

National volume, trends and rates

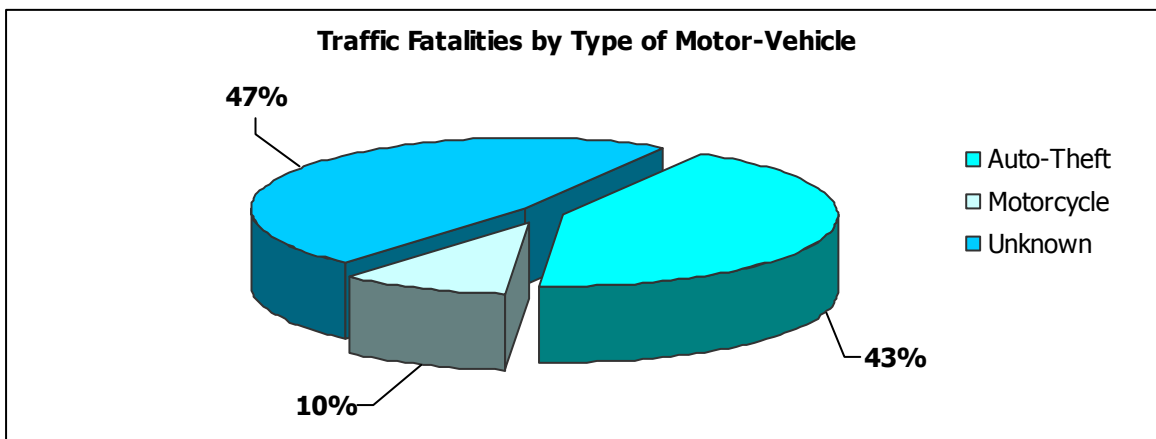

According to reports, this crime recorded a decline of 4% falling from 4.054 cases during 2004 to 3.889 cases during the same period in 2005. That is to say, the daily national average of occurrences amounts to 11 cases during 2005, one case less than the ones occurred in 2004.

February recorded the lowest figures of this crime with 249 cases, while December was the most affected month during 2005, with 394 offenses.

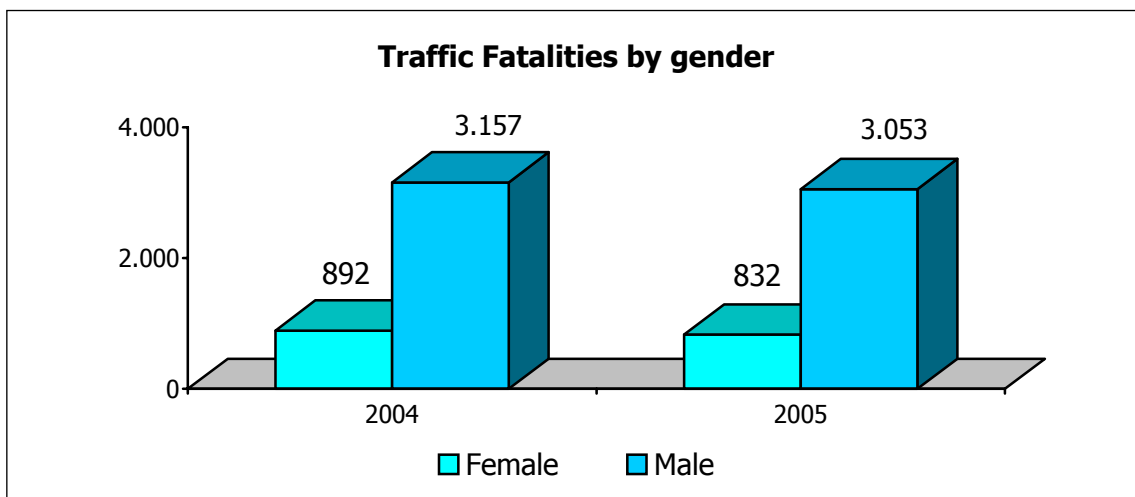

During 2005, the Metropolitan Area of Bogotá reported the largest amount of fatalities as a consequence of traffic accidents, with 494 cases, followed by the M.A of Cali and the provinces of Valle and Nariño with 373, 262 and 211 deaths, respectively.

Though, Bogotá reported the largest amount of Traffic Fatalities in 2005, while comparing this number with the occurrences of this offense in 2004, there was a favorable decrease of 22%, which equals to 136 lesser cases.

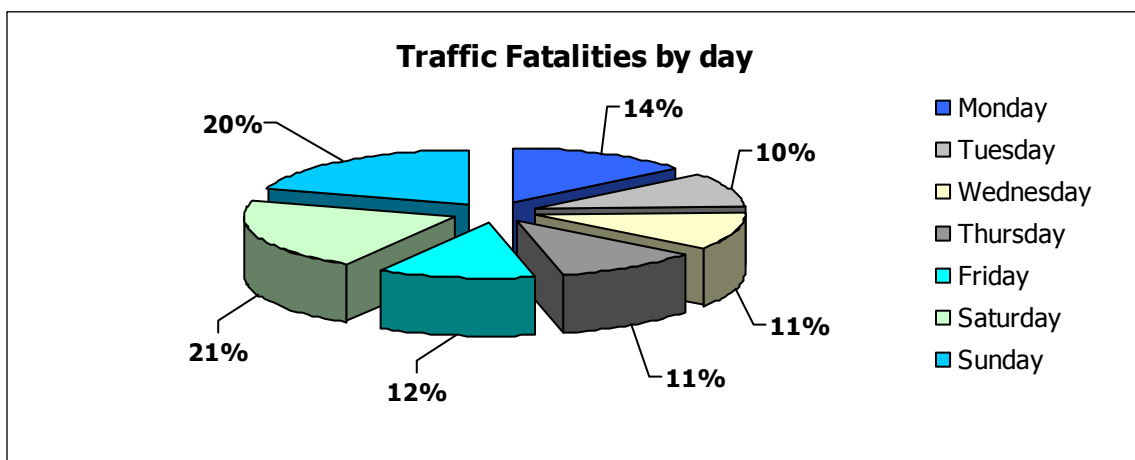

According to reports, 43% of the Traffic Fatalities were caused by vehicles, which equals to 1.685 cases, while 10% corresponded to accidents involving motorcycles. 47% of the cases did not specify the type of accident that caused the death.

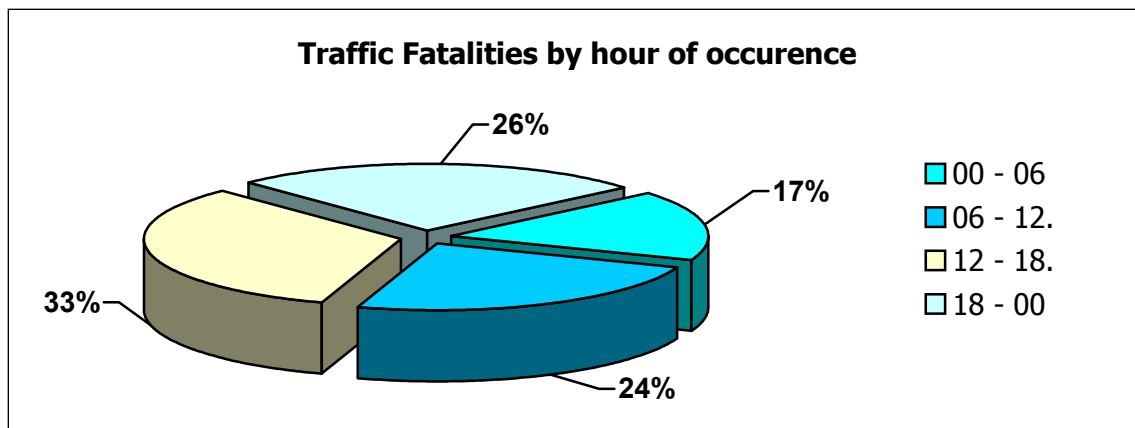

Analyzing the 2005 information by gender, the statistics reported that 79% of these deaths corresponded to male victims, which equals to 3,053 cases and 21% (832) corresponded to female victims.

Comparing 2005 with 2004, there was a reduction of 3% in the number of male victims which equals to 104 fewer victims and a reduction of 7% in the number of female victims which equals to 60 fewer cases.

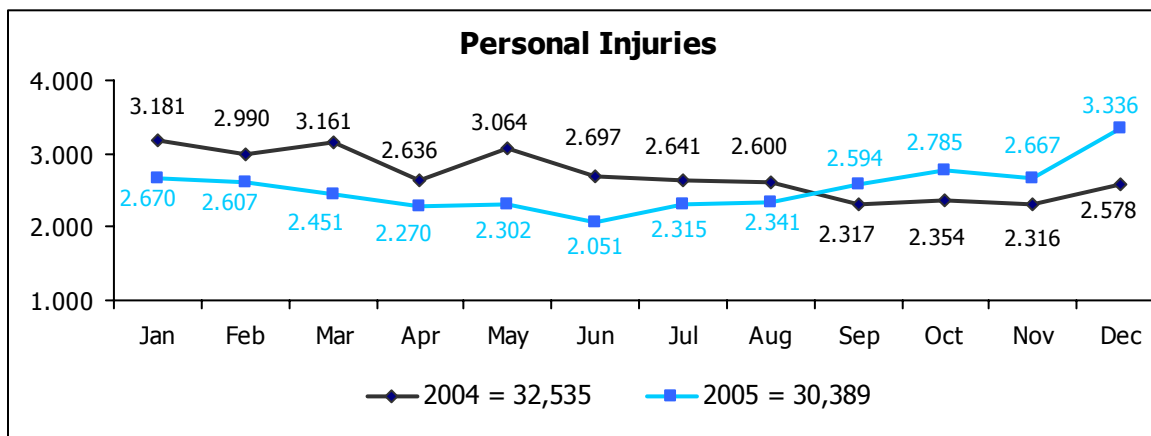

During 2005, Saturday and Sunday recorded the highest percentage of occurrence, with a participation of 21% and 20%, which equals to 835 and 775 deaths, respectively.

The figures reported in this chart show that most of the traffic fatalities took place from midday to 6:00 pm in 2005 as well as in 2004. On the other hand, the fewest number of deaths occurred from midnight to 6:00 am, since there is not too much traffic during that time.

III. PERSONAL INJURIES

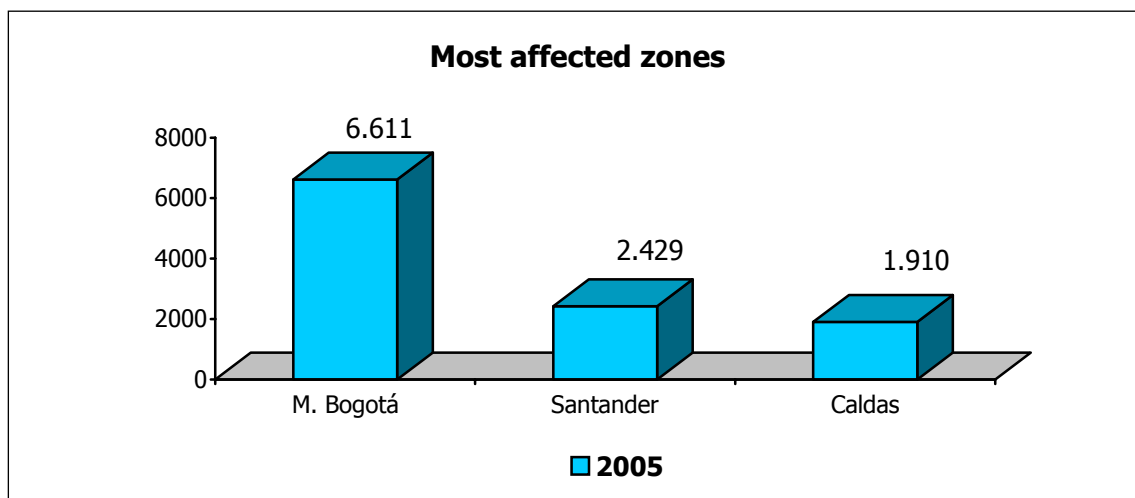

National volume, trends and rates

Personal Injuries showed a decreasing trend when comparing 2004 with 2005. This decrease was of 2.146 cases corresponding to 7%, falling from 32.535 cases in 2004 to 30.389 cases in 2005.

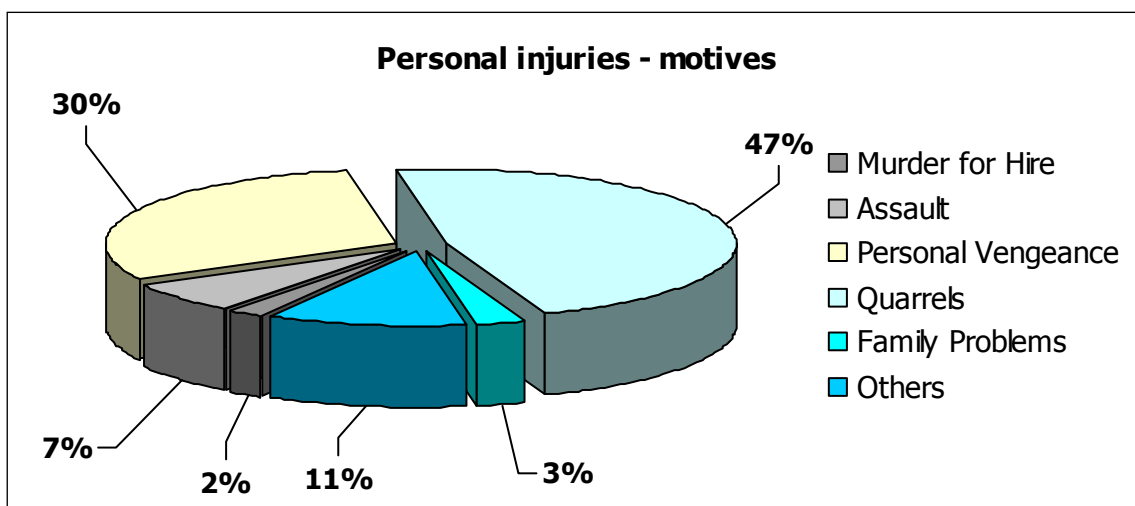

When looking at each month individually in 2005, October and December reported the highest peaks, with 2.785 and 3.336 cases respectively.

The daily average was 83 which equal to 6 fewer wounds than the previous year, and 66 per every 100.000 inhabitants.

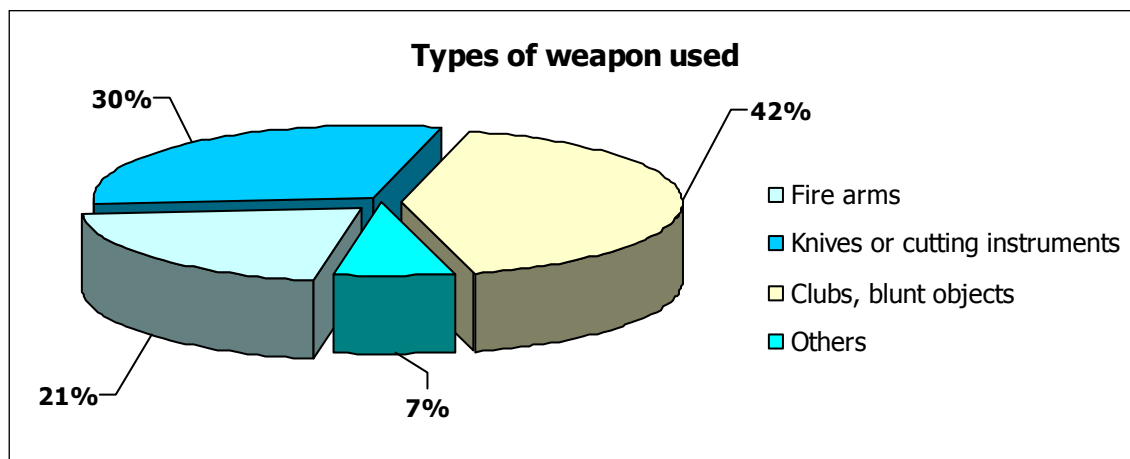

The most affected zones by this offense during 2005 were the Metropolitan Area of Bogotá with 6.611 cases and 22% of participation, Santander province with 2.429 cases and 8% of participation and Caldas province with 1.910 cases.

Despite the fact of being the most affected areas by this crime during 2005, Bogotá and Santander province reported 1.335 and 642 fewer cases respectively, than those occurred during the previous year.

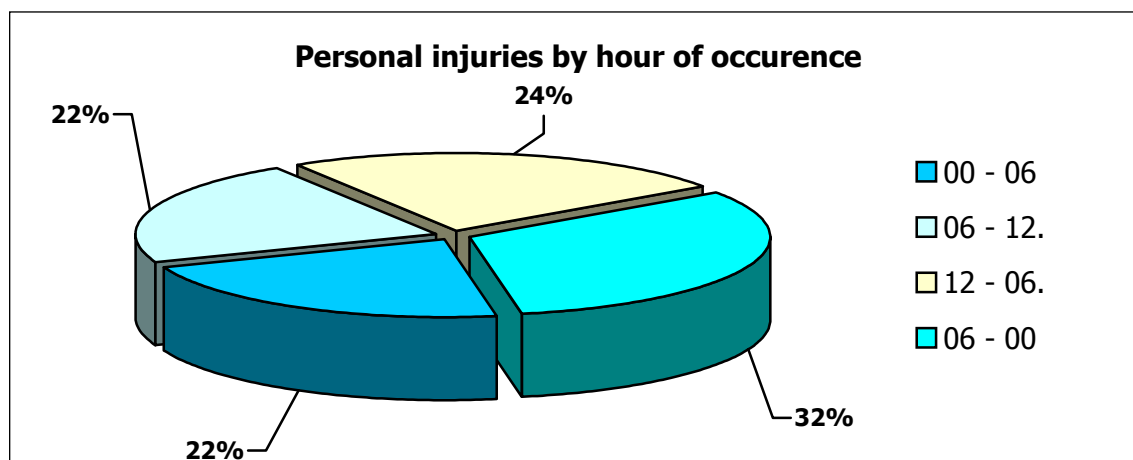

During 2005 the main motives that prompted these crimes were quarrels and personal vengeance, with a participation of 47% or 14.327 cases and 31% or 9.381 cases, respectively. While comparing the 2005 data to 2004, there was a significant increase of 53% in the Personal Injuries that occurred as a result of personal vengeance,

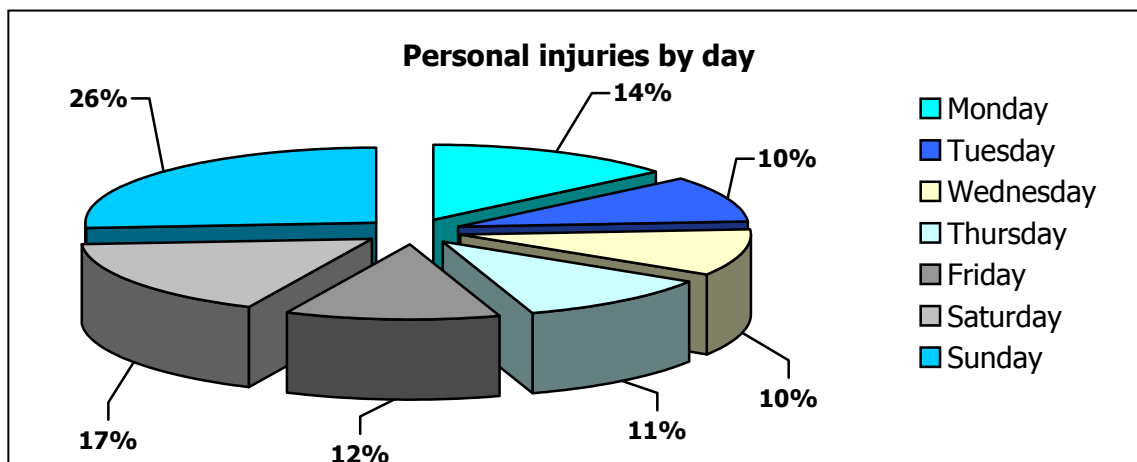

increasing from 6.140 cases in 2004 to 9.381 cases in 2005.

In contrast to Homicides, in which most of the offenses were committed with firearms, in this offense, the most common weapons used to commit the crime during 2005, were clubs and blunt objects, with a participation of 42% and 13.591 cases, repeating the same pattern of 2004. In second place, the statistics reported the use of knives or cutting instruments with a participation of 30%. The use of firearms in this crime reported a decrease of 19% when comparing 2005 with 2004 data, falling from 6.823 cases in 2004 to 5.546 cases during the previous year.

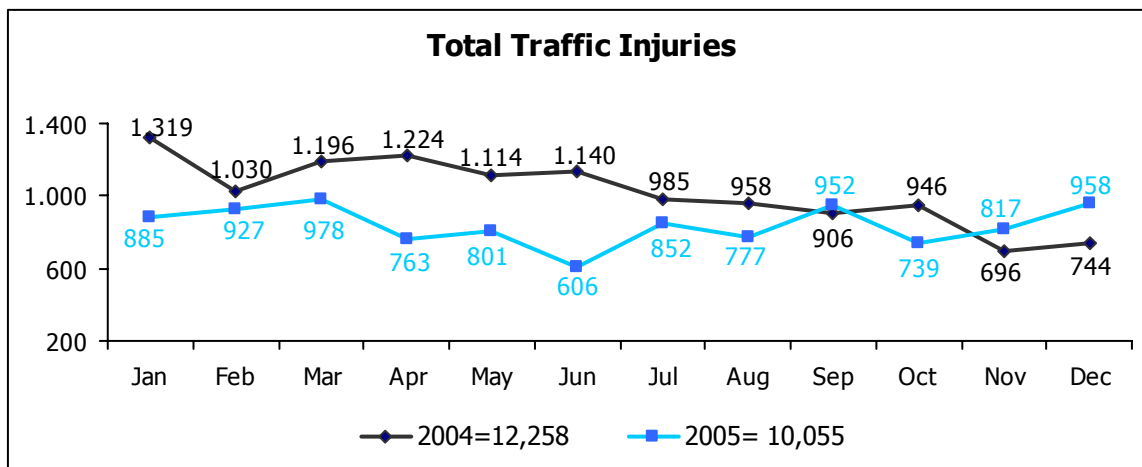

During 2005 the highest percentage of Personal Injuries occurred from 6:00 p.m. till midnight, with a participation of 32% and 9.668 cases, the same situation that took place in 2004, when 33% of the Personal Injuries occurred in that interval of time. When comparing the 2005 data to 2004, the occurrences of this offense from midnight to 6:00 a.m. decreased 16% which equals to 1.228 fewer cases.

During 2005, Saturday and Sunday recorded the highest percentage of occurrence, with a participation of 19% and 25%, which equals to 5.701 and 7.562 cases, respectively.

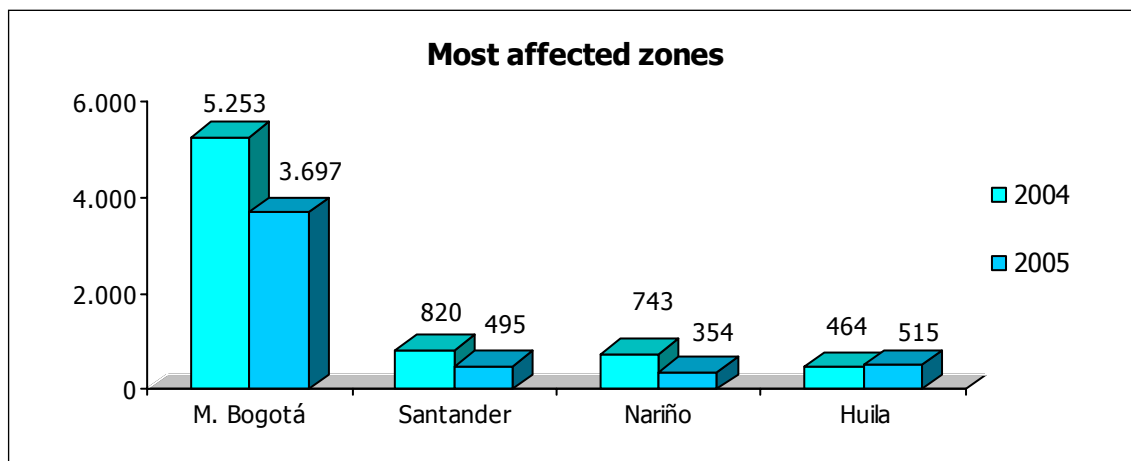

IV. TRAFFIC INJURIES

National volume, trends and rates

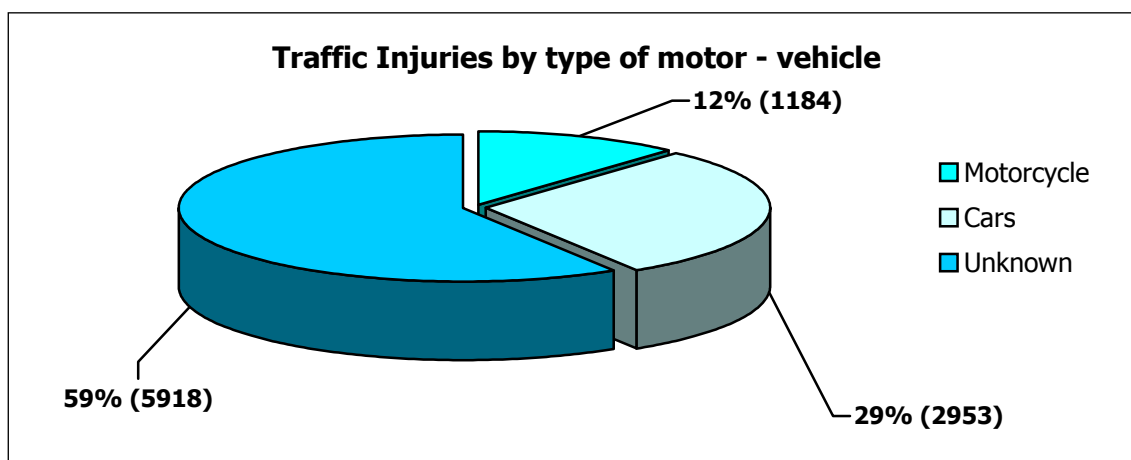

In 2005, occurrences of this offense decreased 18% compared with the 2004 figure, falling from 12.258 to 10.055 cases. Data also showed a decrease in the frequency of Traffic Injuries per 100.000 inhabitants, falling from 27 to 22.

The daily average during 2005 was 27, which means 6 fewer injuries per day than those recorded in the previous year. June, with 606 cases recorded the largest decrease, while March recorded the highest peak, with 978 cases.

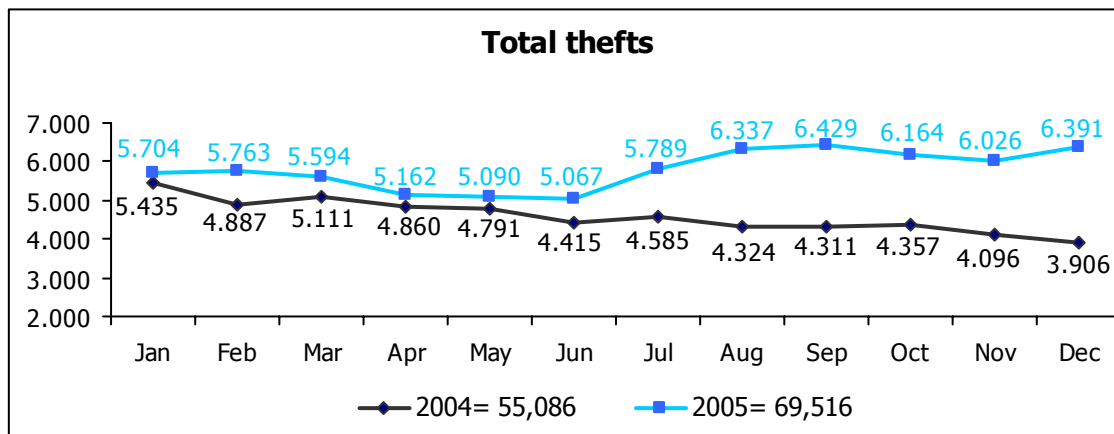

Police departments that recorded the highest amount of cases during 2005 were Bogotá Metropolitan Police, with 3.697 cases, and a 30% decrease when compared with the same period in the previous year, Santander province, 495 cases and a 40% increase, Nariño province, 354 cases and a 53% decrease, and Huila province, 515 cases and 11% decrease.

Analyzing the amount of injuries according with the type of accident which caused them, the 2005 data showed that 29% of those offenses were caused by cars, which correspond to 2.953 cases, 12% were caused by motorcycles, which correspond to 1.184 offenses and 59% of the cases did not report information about the type of accident.

V. THEFTS

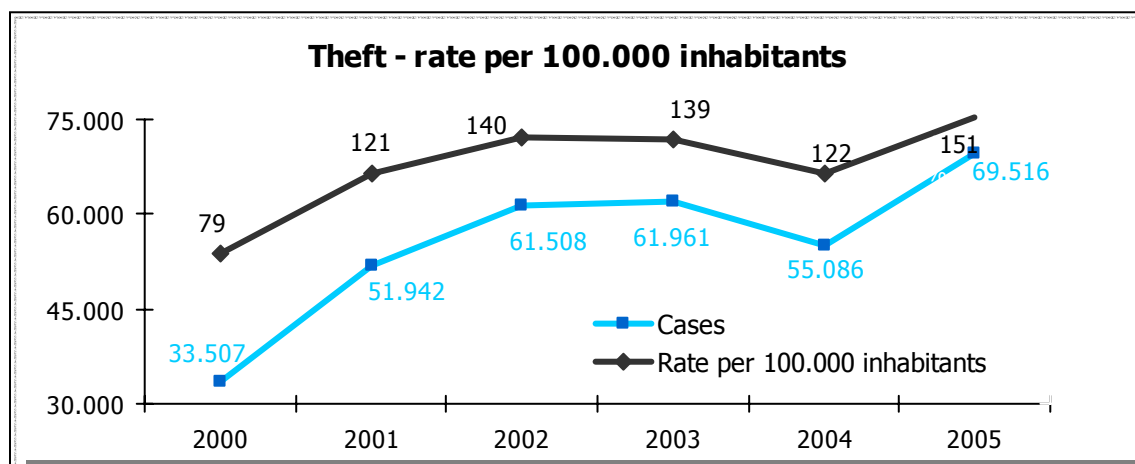

National volume, trends and rates

During 2005, 69,516 thefts were committed; reporting an increase of 26% when comparing it with the 55,086 thefts committed the previous year or 14,430 more cases. The increase in this offense was caused especially by the greater impact of personal thefts which increased 44%, reporting 12,604 more cases when comparing with 2004.

From January to June 2005, there was a slight downward trend reaching the lowest amount of thefts in that month: 5,067. From June onwards the number of thefts started increasing until September, when the highest peak of 6,429 thefts was recorded.

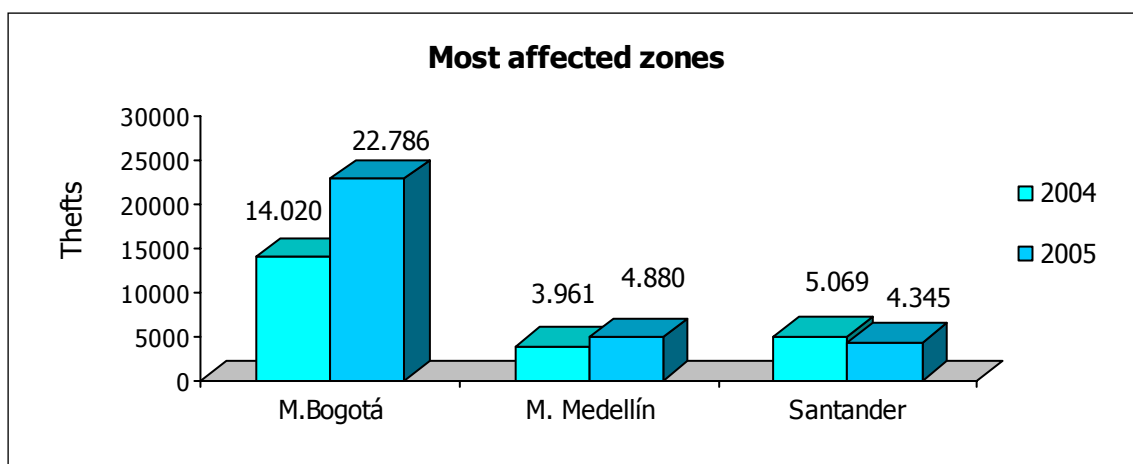

From September to November, the total amount of thefts was continually falling to 6,164 and 6,026 thefts in October and November, respectively. December recorded an increase, reaching 6,391 cases.

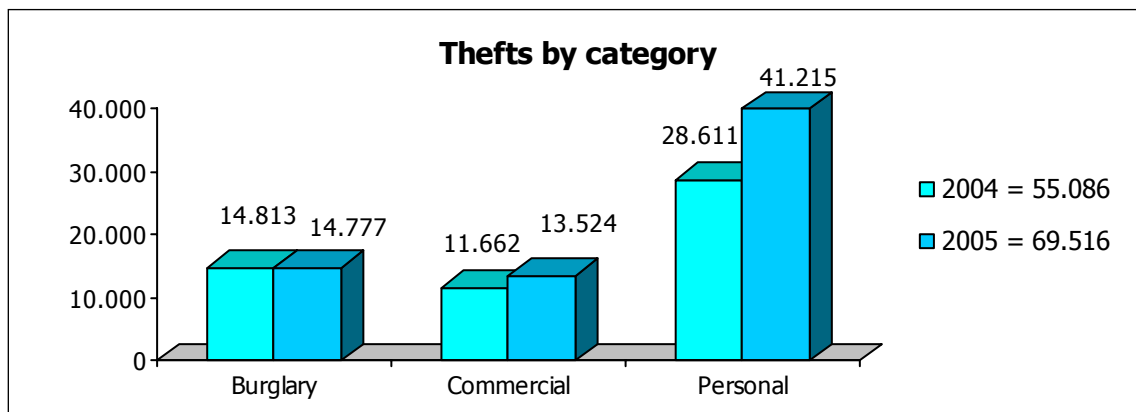

The theft-rate per 100.000 inhabitants reported an upward trend from the year 2000 until 2002 when it was 140, and remained in that level until the year 2003, starting from that time to diminish, reaching a rate of 122 in 2004. However, from 2004 onwards, there has been a continuous rise in the rate per 100.000 inhabitants which was 151 by December 31st, 2005.

The daily theft average during 2005 was 190, which means, 39 more daily cases than those reported during the previous year.

When comparing the 2005 data to 2002, there was an increase of 13% with 69.516 cases. During 2004 there were 55.086 thefts, 6.875 lesser cases than those recorded in 2003.

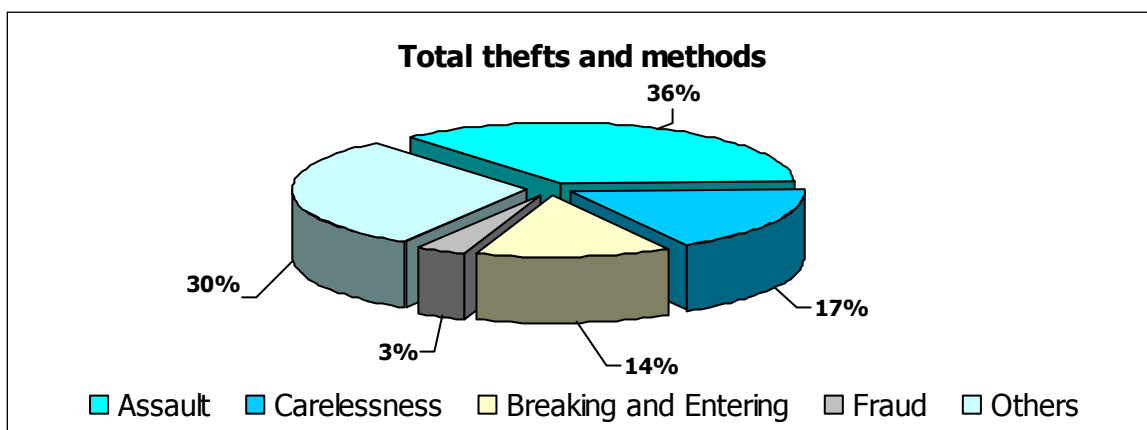

Police departments that recorded the largest amount of thefts were Metropolitan Area of Bogotá with 22.786 cases and a significant increase of 62% or 8.766 more cases, when comparing them with the same period in the previous year, the Metropolitan Area of Medellín with 4.880 cases and a 23% increase, Santander province, 4.345 cases and a decrease of 14%.

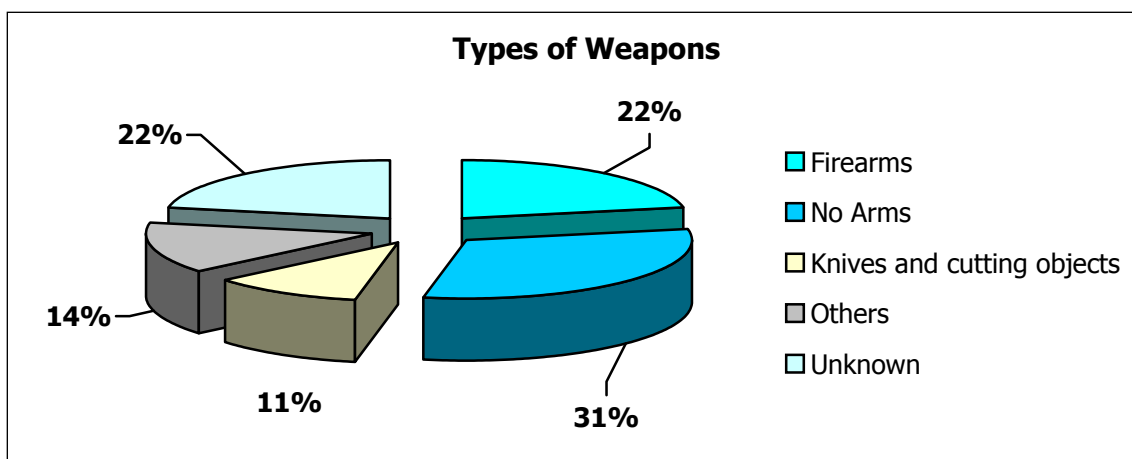

Analyzing the number of thefts by categories during 2005, the high participation of 59% corresponding to personal thefts is indeed evident, which equals to 41.215 cases during 2005, reporting a remarkable increase of 44% while comparing it with 2004, in which 28.611 thefts to persons were reported.

Home theft decreased 37% falling from 14.813 to 14.777 cases, theft to commerce increased 16% which equals to 1.862 more cases.

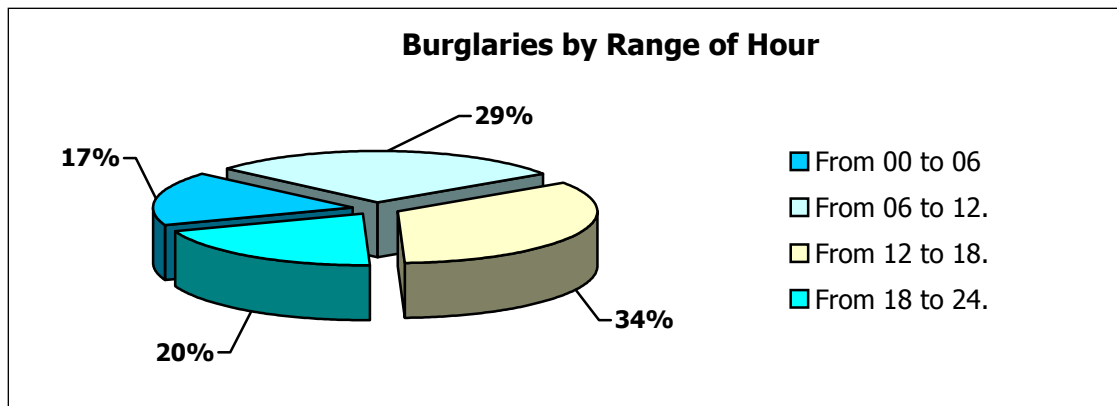

When analyzing the methods employed by the thieves in order to steal people’s property, we can notice that in first place assault on persons was rated, with a participation of 36% of the total thefts; the carelessness of the people was the second cause that made easier for the robbers to assault their victims. The category of forcing locks was ranked in third place, with 14% participation.

Most of the thefts were committed without weapons (31%) or 21.848 cases; 22% was the percentage of participation of fire arms used to carry out crimes, which equals to 15.169 thefts; 11% corresponded to knives and cutting objects, 14% corresponded to other weapons such as clubs and blunt objects among others and the remaining 22%

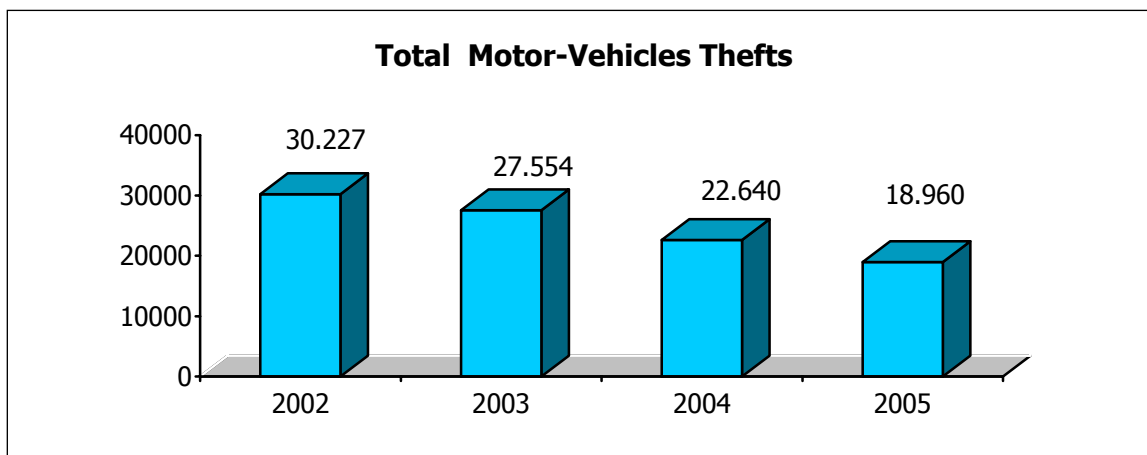

did not specify information about the type of arms used.

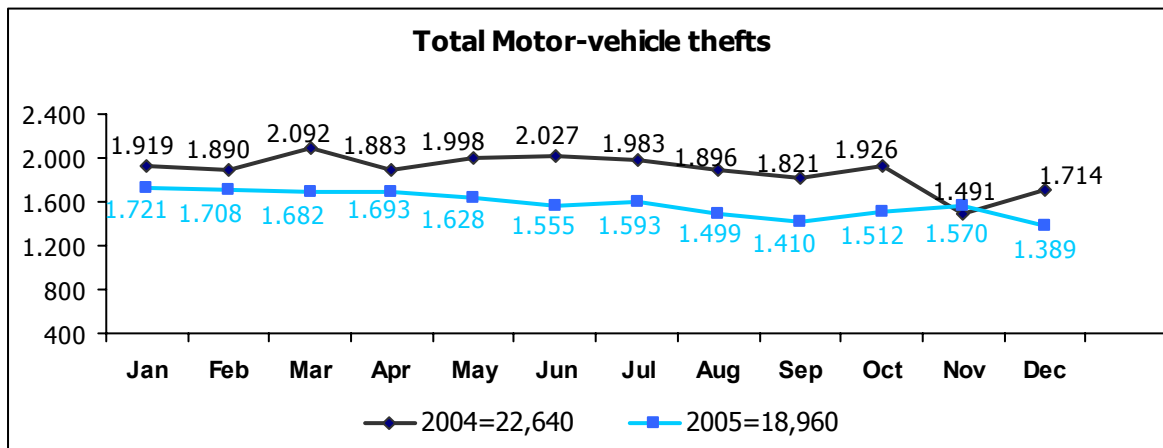

According to the hour of occurrence of these offenses, 34% of the burglaries occurred during daytime, from midday until 6:00 pm. The least amount of burglaries was committed from midnight to 6:00 a.m. (17%).

VI. MOTOR-VEHICLE THEFTS

National Volume, Trends and Rates

From 2002 to 2005 there have been continuous reductions in the number of Motor-Vehicle Thefts, falling from 30.227 cases in 2002 to 18.960 in 2005, which equals to a 37% decrease.

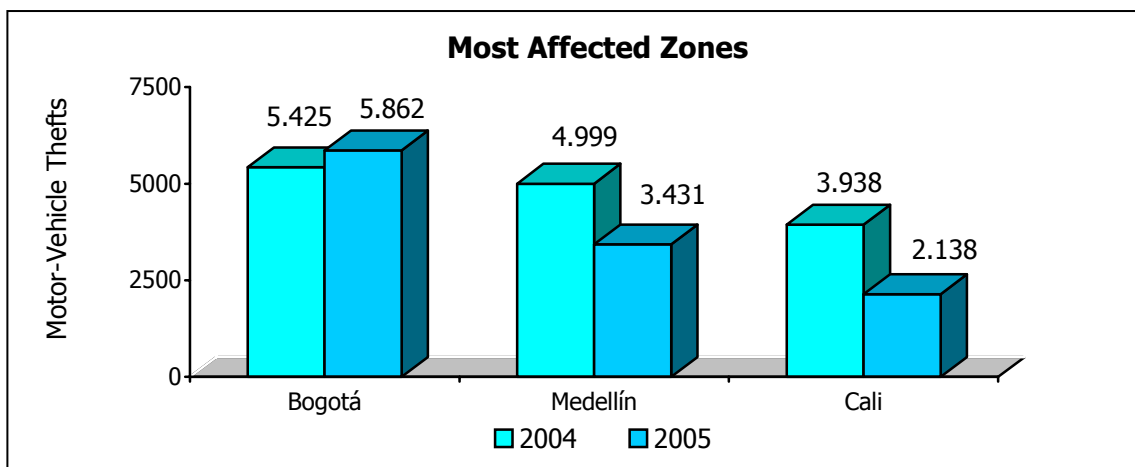

When comparing statistical records we can notice that the frequency of this crime decreased in 3.681 cases, which indicates a variation of -16%.

During the whole year 2005 there was a continuous downward trend in the number of Motor-Vehicle Thefts, except during the months of April with 1.693 thefts, July, October and December with 1.593, 1.512 and 1.389 Motor-Vehicle Thefts, respectively.

The daily average during 2005 was 52, which equals to 10 lesser cases per day, than those reported in 2004.

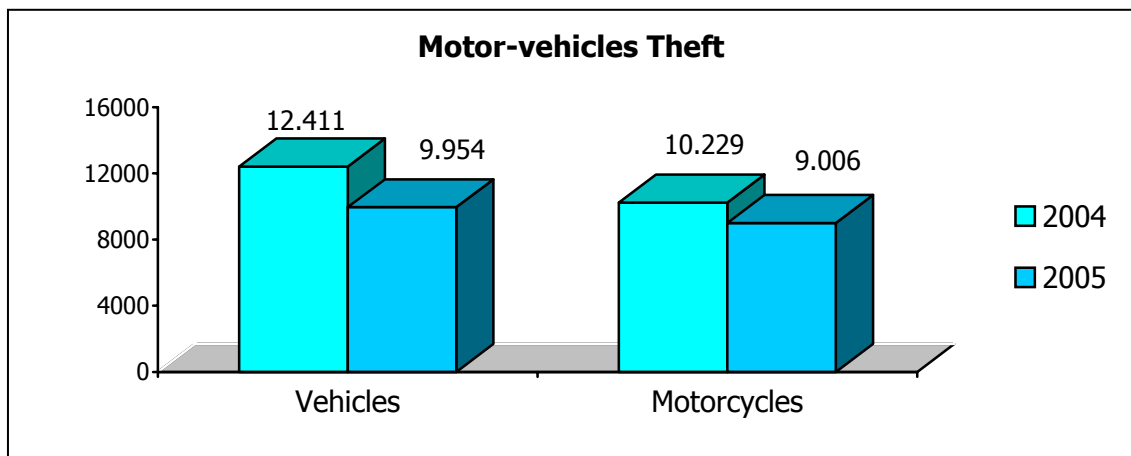

The rate per 100.000 inhabitants showed a decline of 18%, falling from 50 in 2004, to 41 in 2005.

Analyzing the information by categories, there was a larger decrease related to auto-thefts (-20%) falling from 12.411 stolen cars, to 9.954, than the one related to motorcycles (12%), falling from 10.229 stolen motorcycles to 9.006.

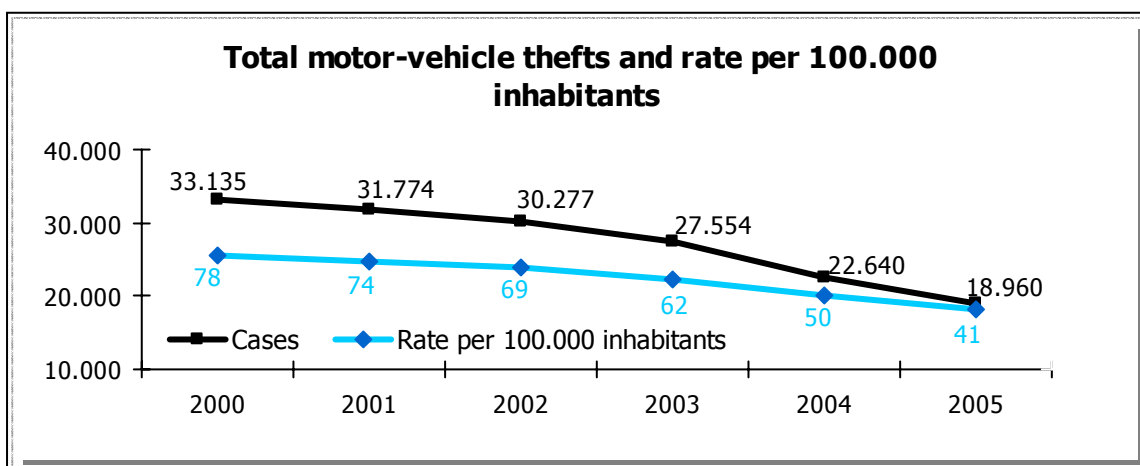

During 2005, the Metropolitan areas of Bogotá, Medellín and Cali recorded the highest rates with 5.862, 3.431 and 2.138 cases, respectively.

When comparing 2005 with 2004, the figures reported a slight increase of 8% in the number of thefts occurred in Bogotá, while the Metropolitan areas of Medellín and Cali reported a decrease in the number of thefts, especially in the Metropolitan Area of Cali, which showed a significant drop of 46% (1.800 lesser cases) and Medellín had a drop of 31% (1.568 lesser cases).

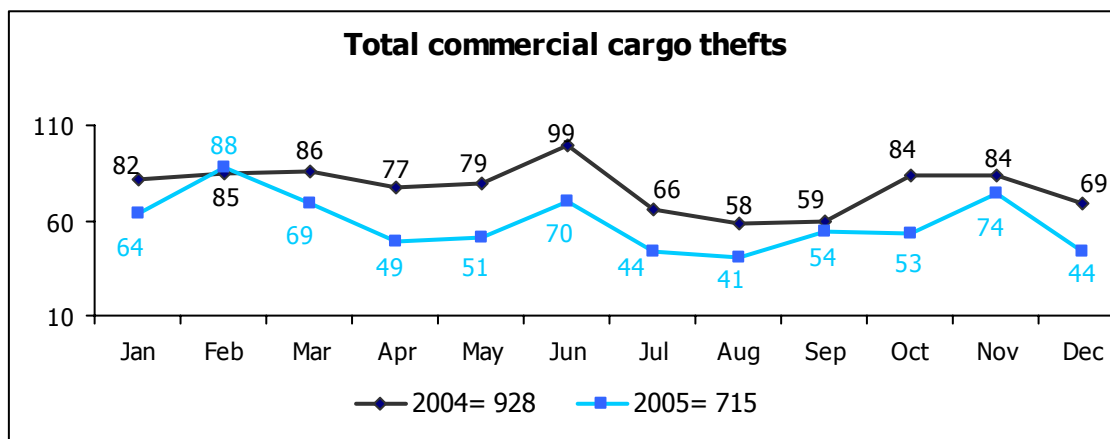

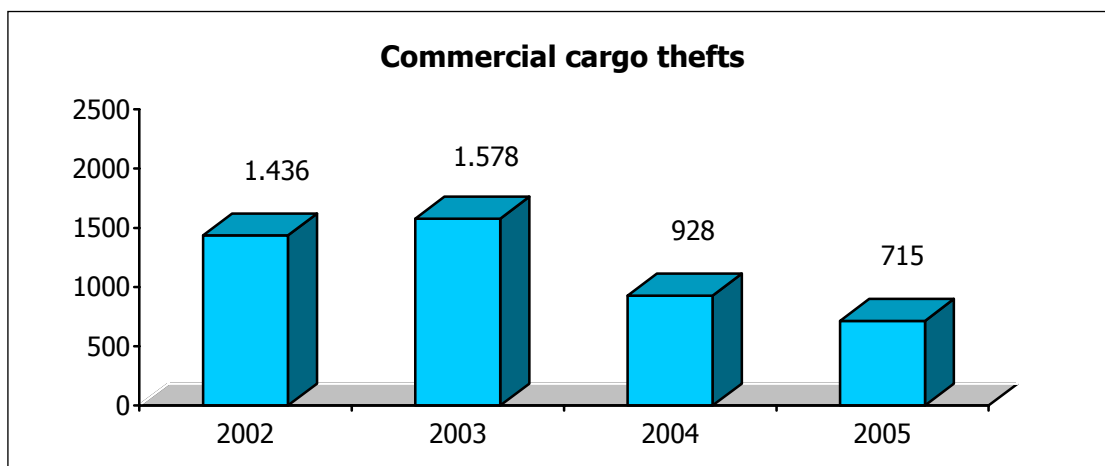

When data is compared separately, one can notice that both, auto and motorcycle thefts, decreased 20% and 12%, respectively, which equals to 2,457 lesser stolen cars, and 1,213 fewer stolen motorcycles.

Since the year 2000, there has been a favorable downward trend in the rate per 100.000 inhabitants falling from 78 in that year, to 50 in 2004 and 41 in 2005. As a consequence, the daily average of Motor vehicle theft has also fallen from 62 in 2004 to 52 in 2005.

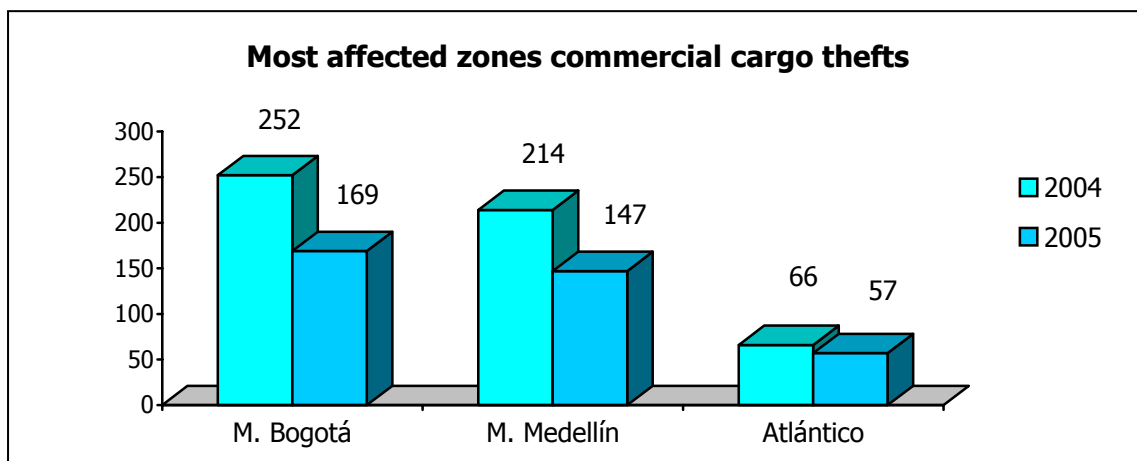

VII. COMMERCIAL CARGO THEFTS

National volume, trends and rates

There was a significant decrease of 23% regarding this offense, when comparing the years 2004 and 2005, falling from 928 cases during the first year to 715 during the second year, which equals to 213 lesser cases.

February reported the highest peak, 88 cases, followed by November with 74 cases. 2 cases of this criminal activity were committed during the day, 1 less than in the previous year.

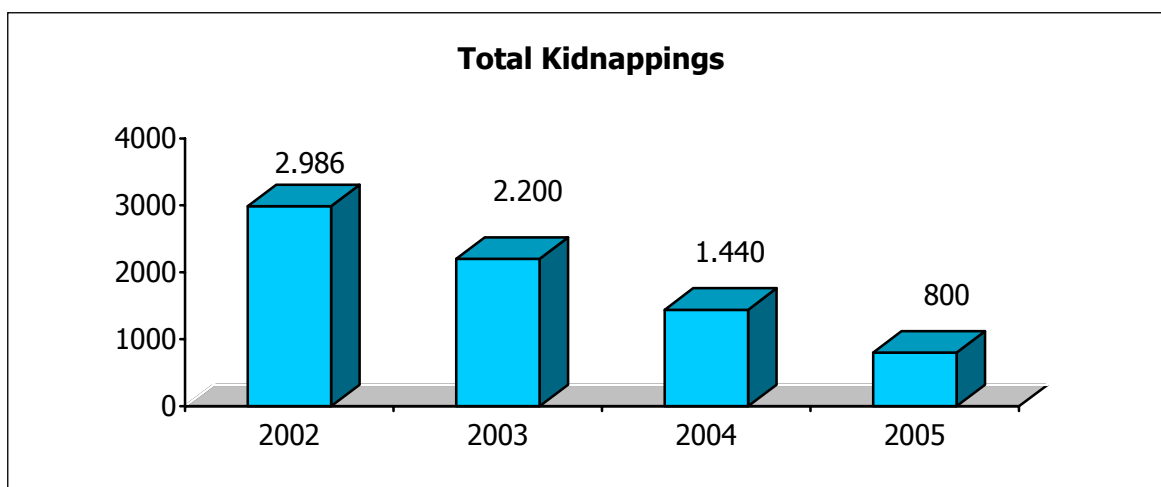

The roads of Metropolitan Areas of Bogotá, Medellín and Atlántico province, with 169, 147 and 57 cases respectively, were the most affected zones during 2005.

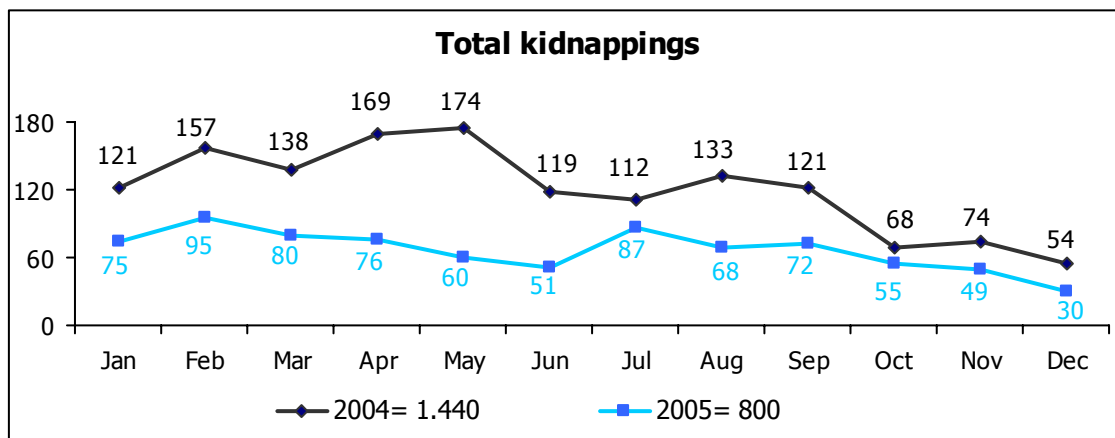

Although Bogotá reported the highest number pertaining to this offense during 2005, it also showed a significant decline of 33% while comparing with de 2004 data, which equals to 83 lesser cases. Medellín also reported a decline of 31% or 67 lesser cases and Atlántico reported a slight decline of 13% or 9 lesser cases.

VIII. KIDNAPPINGS

National volume, trends and rates

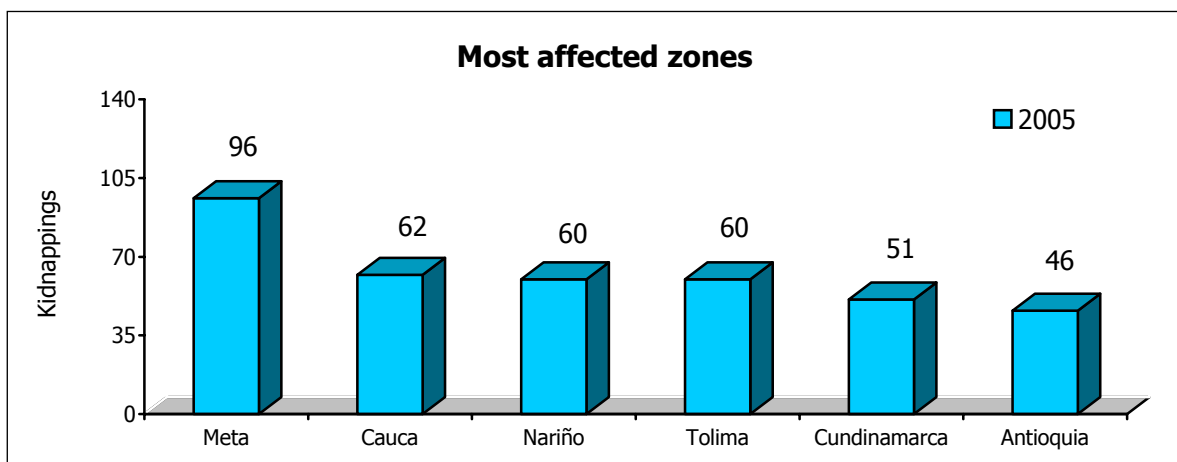

The 2005 data showed a significant reduction of 73% in this crime, falling from 2.986 cases in 2002 to 800 cases in 2005.

This crime showed a significant decrease of 44%, which is equivalent to 641 lesser cases, with a daily average of 2 cases per day in 2005 (2 lesser daily cases than in 2004).

In 2005, from February onwards, there was a downward trend until June, when this crime started growing until the end of July, when it reached the highest peak of 87 offenses. However, since July, there has been a favorable downward trend, falling to the lowest amounts of kidnappings in October, 49 cases, November and December, 49 and 30 cases respectively. The rate per 100.000 inhabitants also decreased from 3 cases in 2004, to 2 cases in 2005.

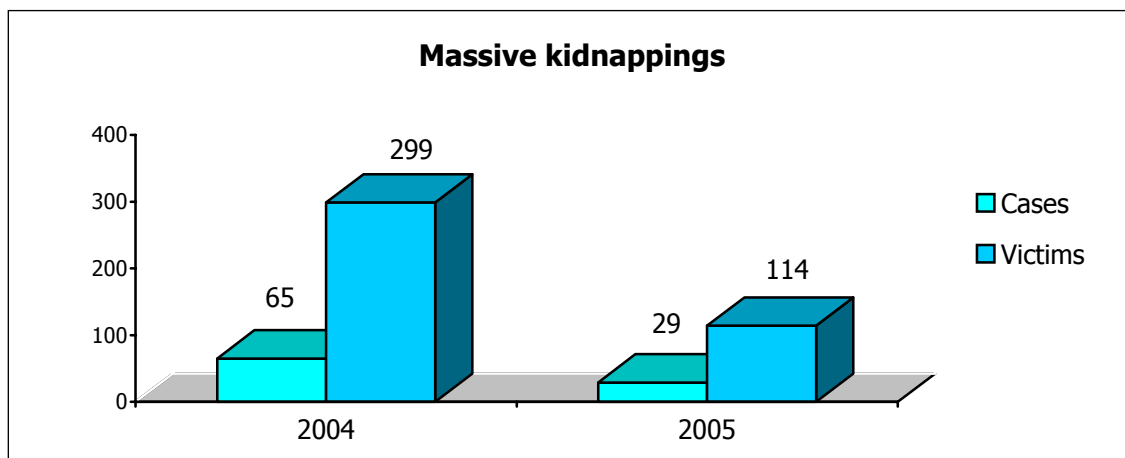

During the year 2005 the most affected zones of the country by this crime, were the provinces of Meta (96 cases), Cauca (62 cases), Nariño (60 cases), Tolima and Cundinamarca, with 60 and 51 cases respectively, and Antioquia with 46 cases.

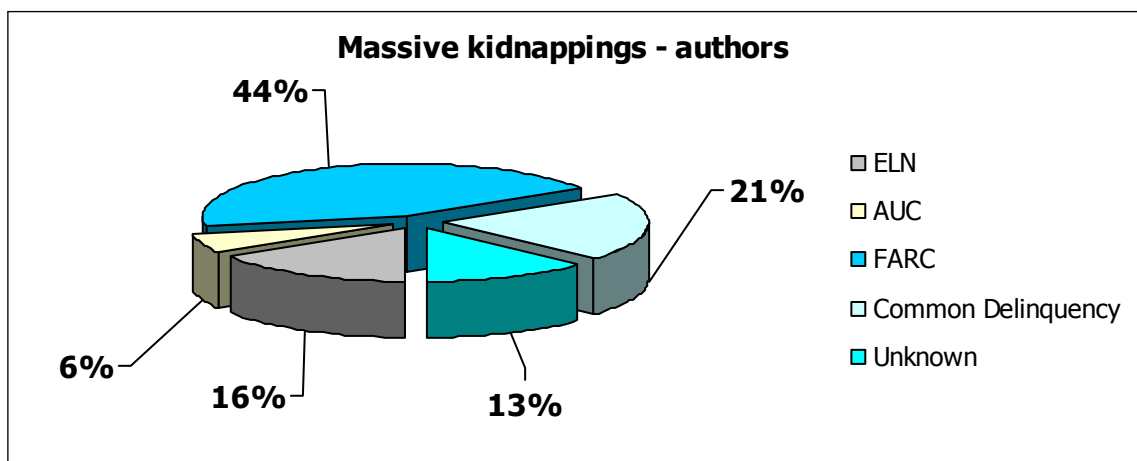

We would like to point out that in Antioquia province, this criminal activity decreased 75% falling from 184 cases in 2004, to 46 cases in 2005. In Meta province it decreased

10%, in Cauca province it fell 33% (from 92 to 62 cases), and in Tolima province it decreased 26%. Cundinamarca province recorded an increase of 89%.

IX. MASSIVE KIDNAPPINGS

The phenomenon of massive kidnapping started to be registered since 1999. Before that year this crime was reported in some provinces of the country and its accountancy was taken within the total kidnappings. From 1999 onwards, due to the intensity and magnitude of its occurrences, this offense started to be registered in a separate way, reaching its highest peak in 2001 and keeping a downward trend until 2004.

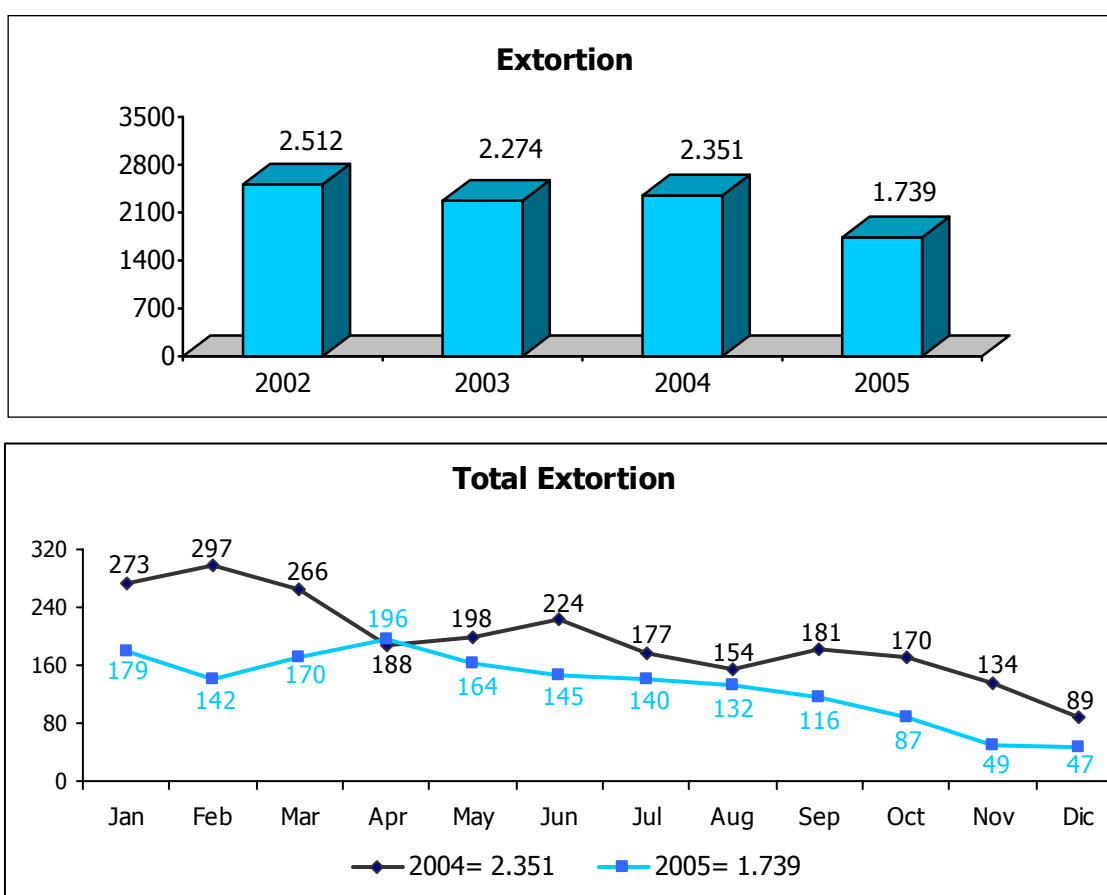

During 2005 there were 29 cases and 114 victims, which equals to a 55% decrease in the total number of cases and a 62% decrease in the total number of victims.

According to the figures shown in the graph, 44% of the kidnappings were committed by the FARC, (the Revolutionary Armed Forces of Colombia) 21% were attributable to common delinquency, 16% were committed by the subversive group ELN, (The National Liberation Army) 6% were committed by the subversive group AUC (the United Self – Defense Forces of Colombia). In 13% of the cases, there was no information about the authors.

X. EXTORTION

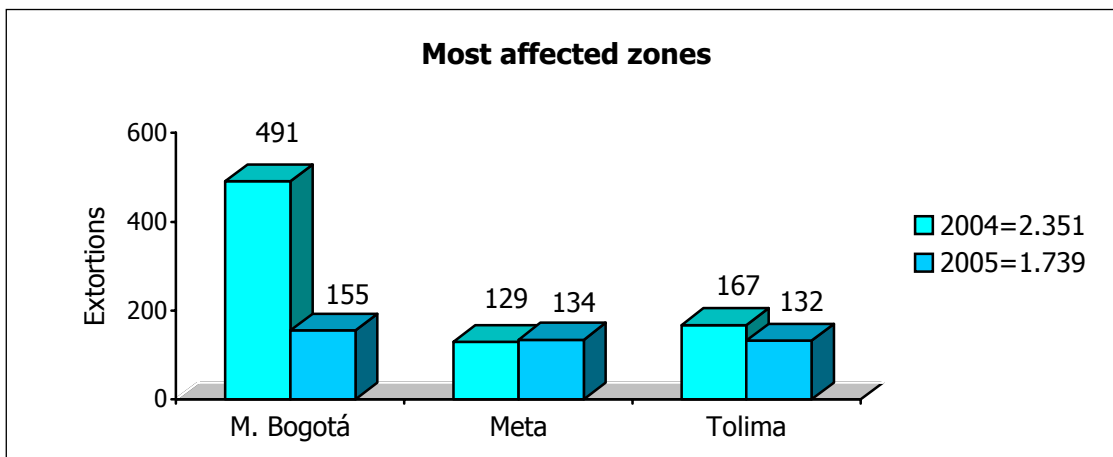

National volume, trends and rates

This crime, which affects directly the coexistence and citizen’s safety, has recorded a decline of 33% with a significant difference of 612 lesser cases. When comparing the trend in 2005, we can notice that from April onwards, there has been a constant downward trend, reporting a lower number of offenses than those recorded in 2004.

The daily average fell from 6 to 5 cases per day, with the consequent reduction in the

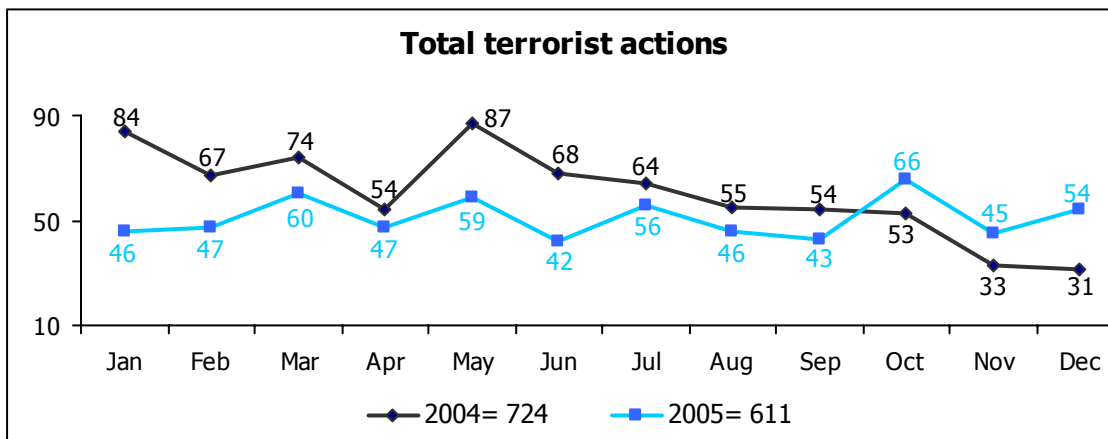

rate per 100.000 inhabitants which fell from 5 to 3 cases.

During 2005 the cities and provinces recording the highest frequencies were the Metropolitan Area of Bogotá, Meta province and Tolima province with 155, 134 and 132 cases of extortion respectively. However, the Metropolitan Area of Bogotá showed an important drop of 68%, (155 lesser cases), Meta reported an increase of 4% and Tolima recorded a drop of 21% (35 lesser cases).

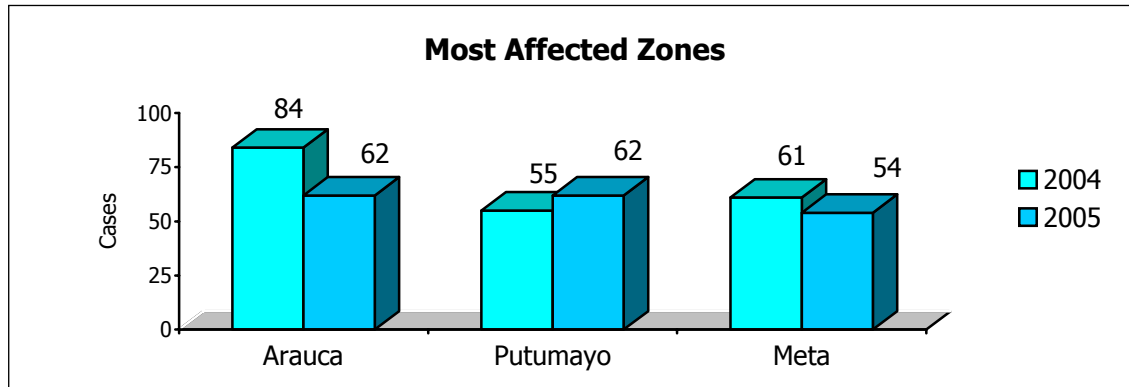

XI. TERRORIST ACTIONS

National Volumes

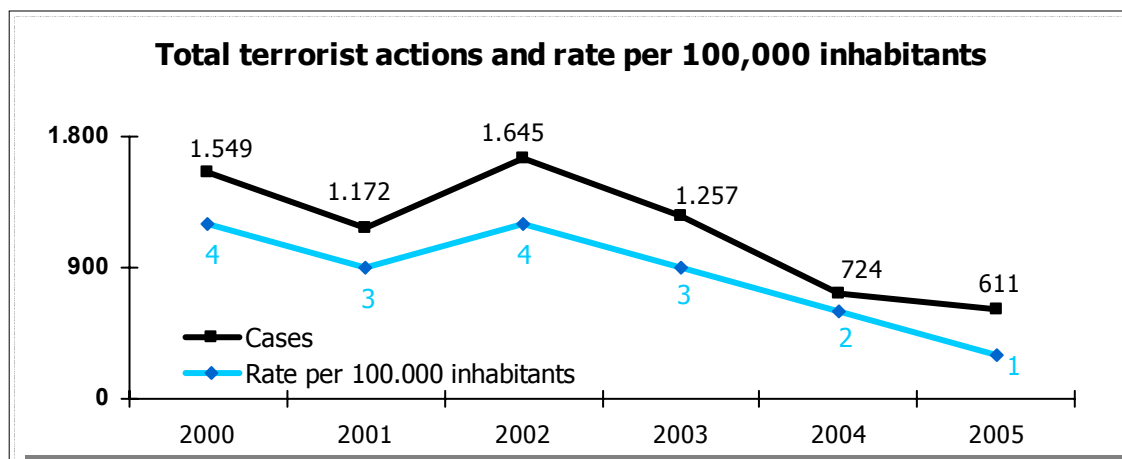

Even though this criminal activity recorded a 16% decrease, it is a very serious phenomenon affecting gravely the State, due to the devastating effects caused to the citizen's life and property.

The 2005 data showed an increasing trend during the first three months reaching a peak of 60 cases in March and recording an average of 2 cases per day. October recorded the highest peak of the year with 66 cases.

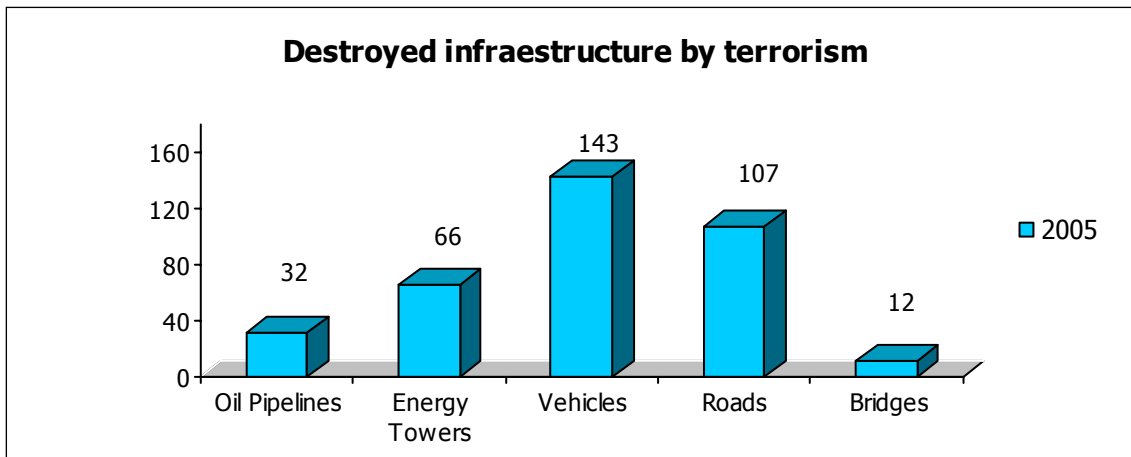

During 2005, the largest amount of terrorist actions occurred in Arauca and Putumayo provinces, with 62 cases each one, followed by Meta, province with 54 cases.

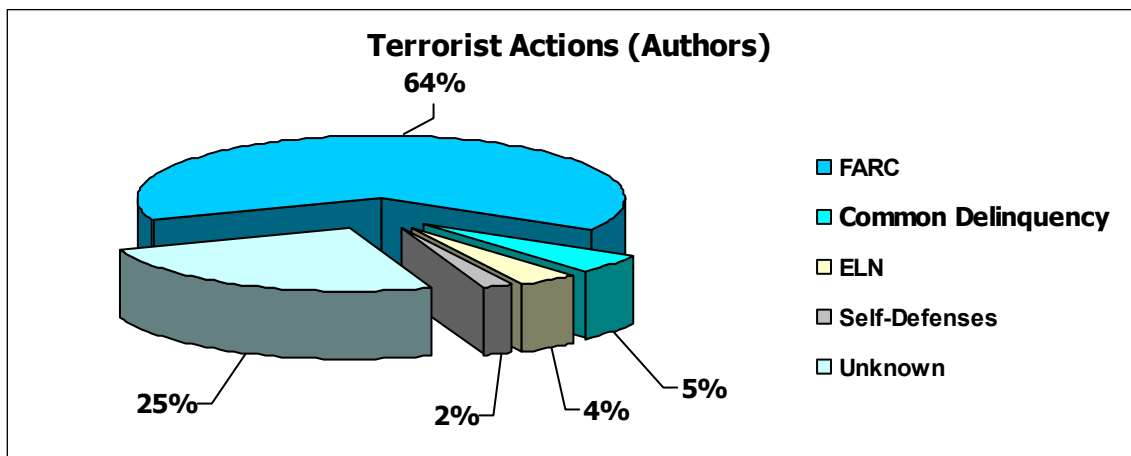

Although Arauca was the most affected province by this scourge during 2004, in 2005 it recorded a favorable decrease of 26% or 22 lesser cases, Putumayo recorded an increase of 7 cases (12%), and Meta recorded a decrease of 7 cases (-11%).

Since 2002, there has been a continuous reduction in the terrorist-actions rate per 100.000 inhabitants which has dropped from 4 cases in 2002 to one case in 2005. When comparing the 2002 with 2005 data, there has been a significant reduction of 63% in this crime, falling from 1.645 cases in the first year to 611 cases in 2005.

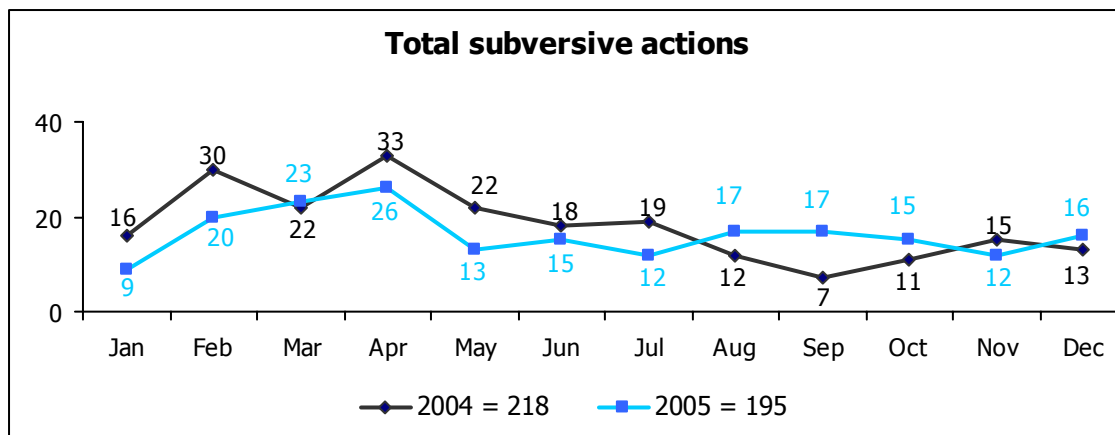

The most affected assets by terrorist actions were vehicles and roads, followed by energy towers and oil pipelines, since the armed groups have recorded a historic trend to attack international and local petroleum companies. These terrorist actions caused irreparable losses of human lives and a significant monetary cost for the economy of the country.

Analyzing the information related to the authors of this crime, the figures showed that 64% of the terrorist actions are attributable to the armed group FARC, which equals to 391 terrorist actions. The common delinquency, the ELN guerrilla group and the self-defense groups committed 25%, 4% and 2% of the terrorist actions throughout the nation, respectively.

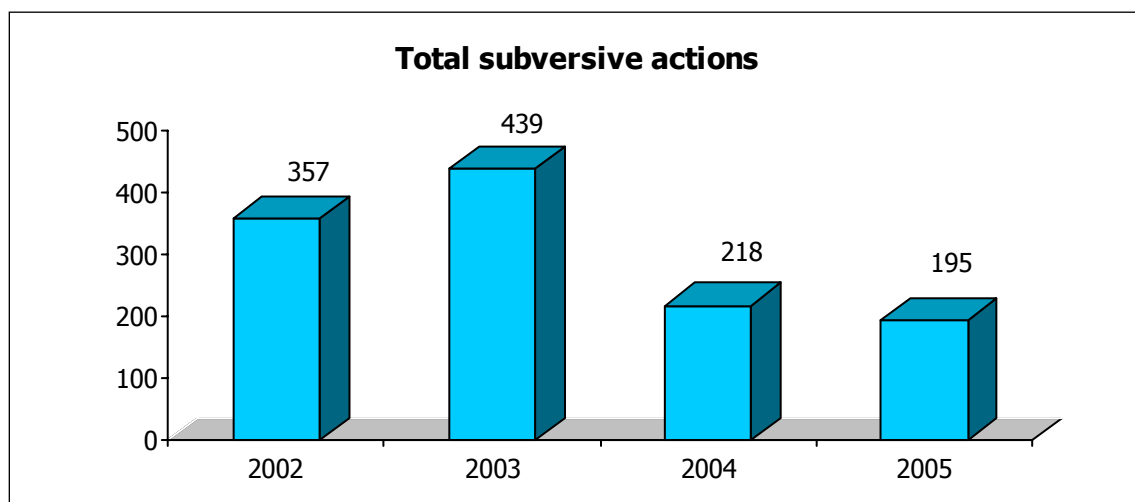

XII. SUBVERSIVE ACTIONS

National volume, trends and rates

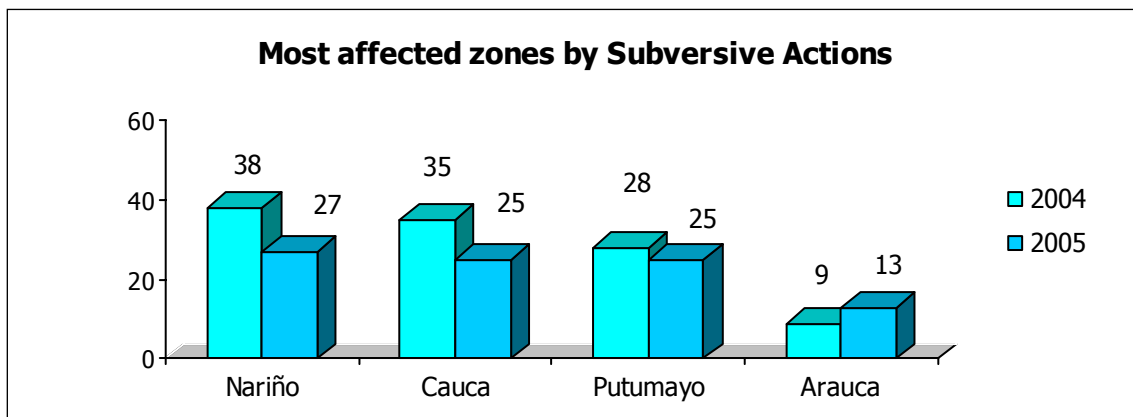

This criminal activity reported an 11% decrease or 23 lesser cases, when comparing the two years object of this study. However, when evaluating the monthly variations, there was a tendency to increase during the first three months, reaching the highest peak of the year in April with 26 cases.

From April to May there was a noticeable drop of 50% in the number of terrorist actions falling from 26 to 13 cases in May, month in which the trend recorded slight increments until August, starting a downward trend since then. The daily average was the same of 2004, 1 case per day and the rate per 100.000 inhabitants was 0, 40.

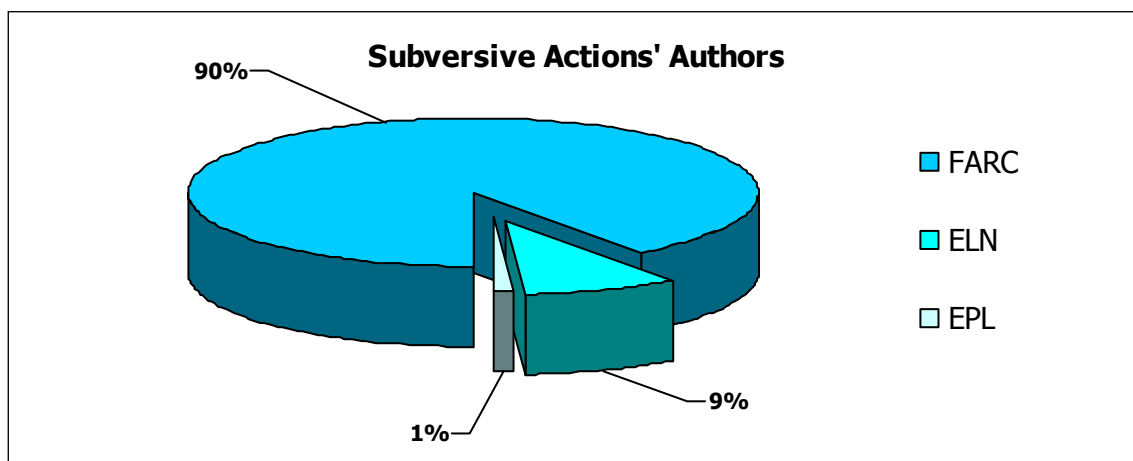

When comparing the 2002 data with 2003, the statistics showed an increase of 23% or 82 more cases. However, this trend changed from that year falling from 439 subversive

actions to 218 in 2004 and 195 subversive actions in 2005.

Nariño province recorded the largest number of subversive actions, with 27 cases, followed by Cauca and Putumayo provinces with 25 cases each one and Arauca province with 13. Although those were the zones where guerrilla groups perpetrated the largest amount of hostile actions against the National Police during 2005, while comparing to the 2004 data, there were reductions in the total number of offenses occurred in those provinces.

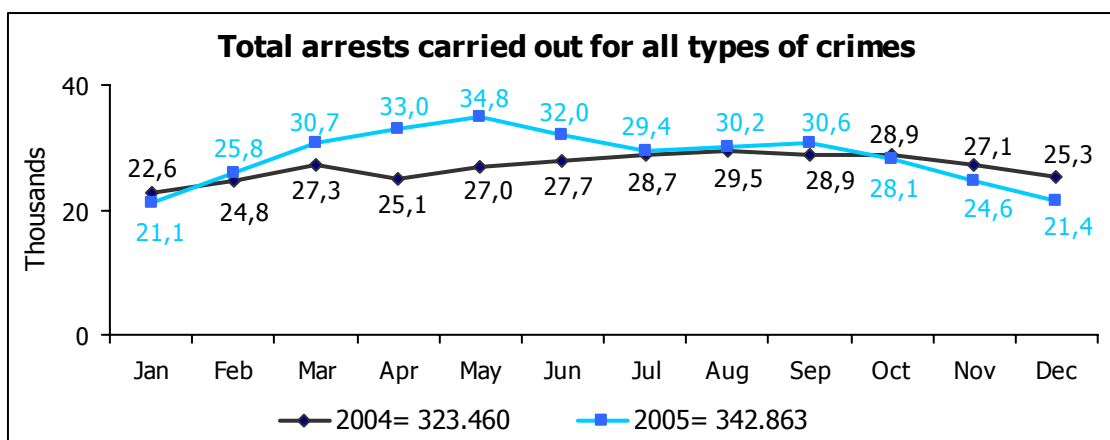

The 2005 data showed that 90% of the subversive actions were committed by the armed group FARC (the Revolutionary Armed Forces of Colombia), 9% of the actions were committed by the ELN (the National Liberation Army) and 1% by the EPL.

COLOMBIAN NATIONAL POLICE OPERATIONAL ACHIEVEMENTS

OPERATIVE ACHIEVEMENTS		YEAR		VARIATION	
		2004	2005	ABSOLUTE	PERCENTAGE
ARRESTS (FOR ALL CRIMES)		323.460	342.863	19.403	6%

I. ARRESTS CARRIED OUT FOR ALL TYPES OF CRIMES

National volume, trends and rate

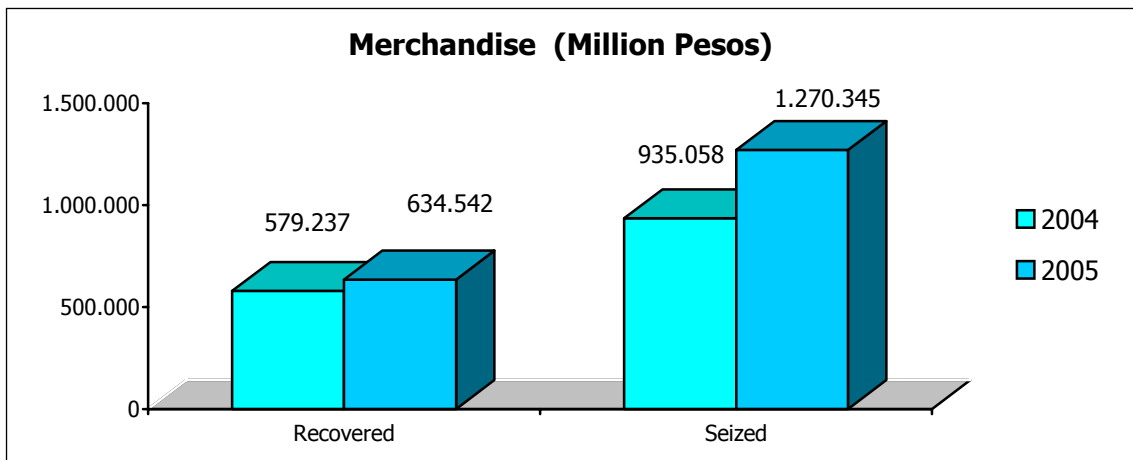

This operative activity showed an increase of 6%, reaching a total of 342.863 people arrested in 2005, which is equivalent to 19.403 more arrests than those that took place in 2004, with a daily average of 888. Thus, the commitment of the National Police is evident in the fight against organized crime.

The 2005 data showed an upward trend in the number of captures from January to May when it reached a peak of 34.840 arrests and started falling to 29.454 captures in July. From July to October there was an average of 29.000 arrests per month followed by a slight decrease of 12% in November.

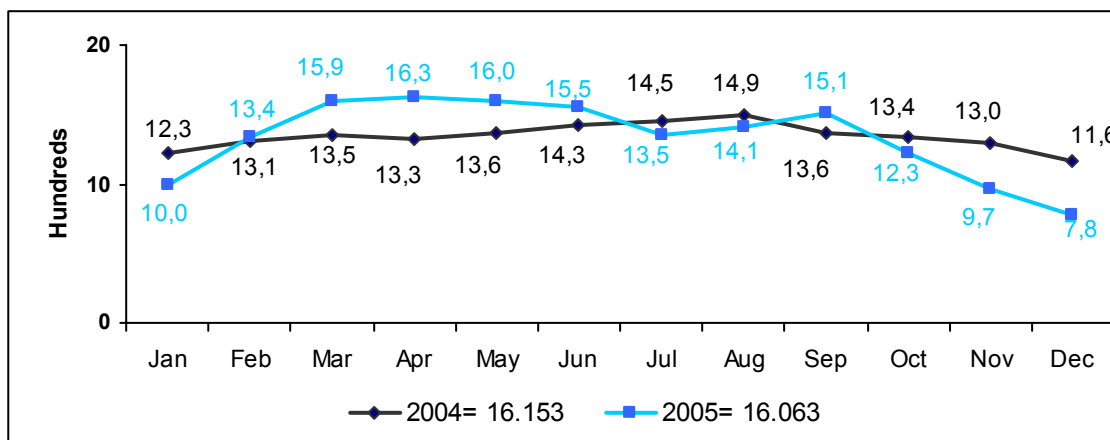

In the case of subversive and self-defenses arrests, for the year 2005, there was a slight decrease in comparison with the year 2004. For instance, during the year 2005, there was a decrease of 12% in the number of subversives arrested and a decrease of 24% in the number of self-defenses (also known as "paramilitaries").

II. RECOVERED AND SEIZED MERCHANDISE

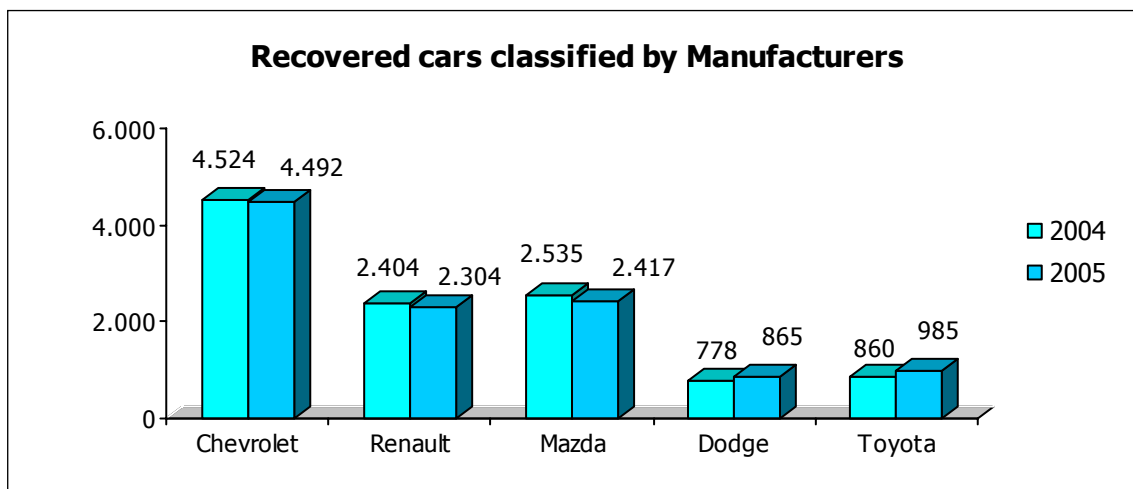

The operative achievements in the field of merchandise show a positive trend. For example, there was an increase of 10% in the value of recovered merchandise, and a significant rise of 36% in the value of seized goods.

III. RECOVERED MOTOR-VEHICLES

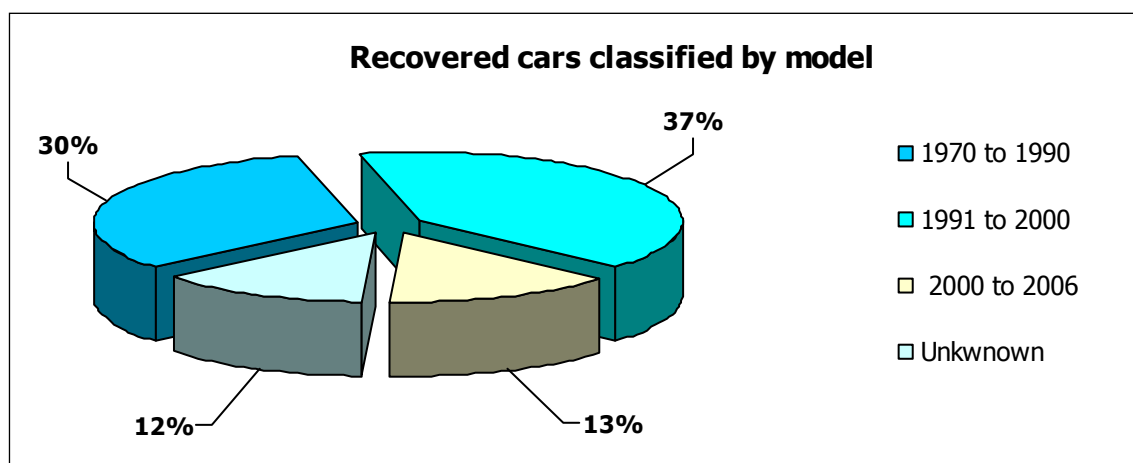

The 2005 data showed a 1% decrease in this operative activity, which equals to 90 lesser recovered vehicles than those recovered in 2004.

During the first six months of 2005, there were a higher number of recovered vehicles than those recovered in the same period in 2004. The last quarter of 2005 recorded a downward trend, falling from 1.239 recovered vehicles in October to 976 in November and 783 in December.

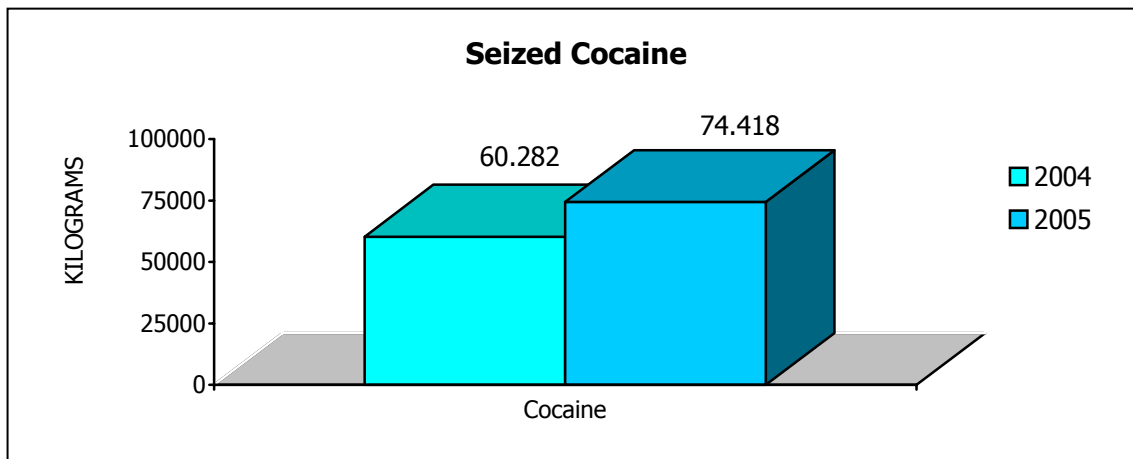

Analyzing the statistics by car manufacturers, 28% of the recovered cars during the last two years have been Chevrolet, with a total of 4.492 cars during 2005, 32 less than those recovered in 2004; in second place, Renault and Mazda recorded a total of 2.304 and 2.417 recovered cars, respectively, followed by Dodge and Toyota, with a participation of 6% each one, and 865, 985 recovered cars, respectively.

Thus, the commitment of the National Police is evident here in the fight against organized crime

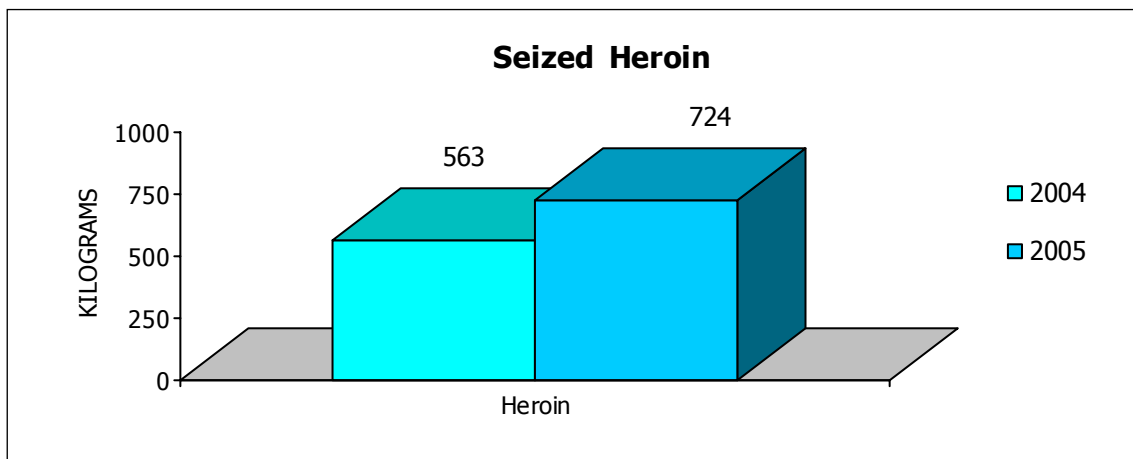

Most of the recovered cars during 2005 corresponded to models between 1991 and 2000, followed by models between 1970 and 1990. There was a lesser participation of new recovered cars whose year was between 2000 and 2006.

IV. ILLICIT DRUG SEIZURES

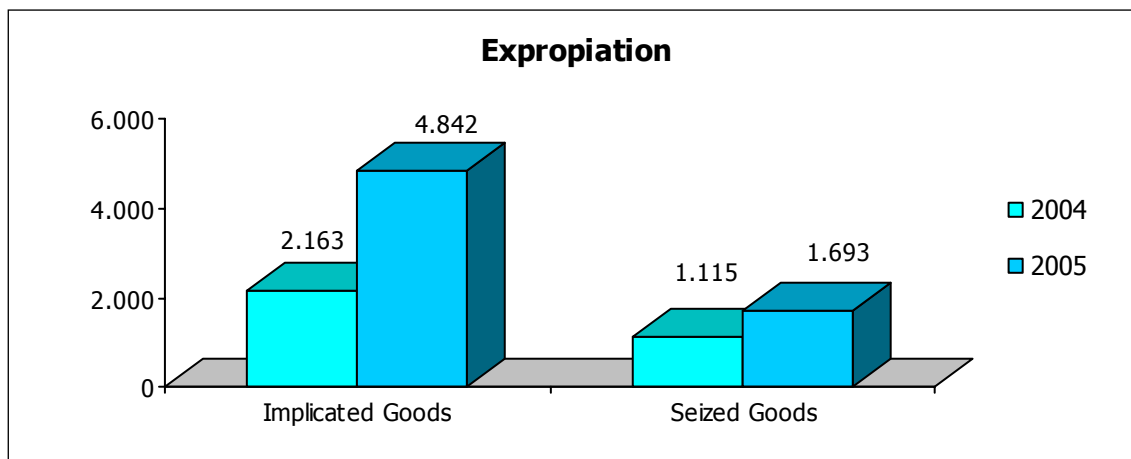

Since drug trafficking is the most important source of funding for the guerrillas, the Antinarcotics Directorate has done a significant work in this field which is backed up by the statistics on this report.

The seizure of drugs shows a notorious rise as well. For example, for the year 2005, 74.418 kilos kilograms of cocaine and 724 kilos kilograms of heroin were seized by the Colombian Police. This represents an increase of 28% in the amount of heroin and 23% in the amount of cocaine seized for the year 2005 in contrast with the previous year.

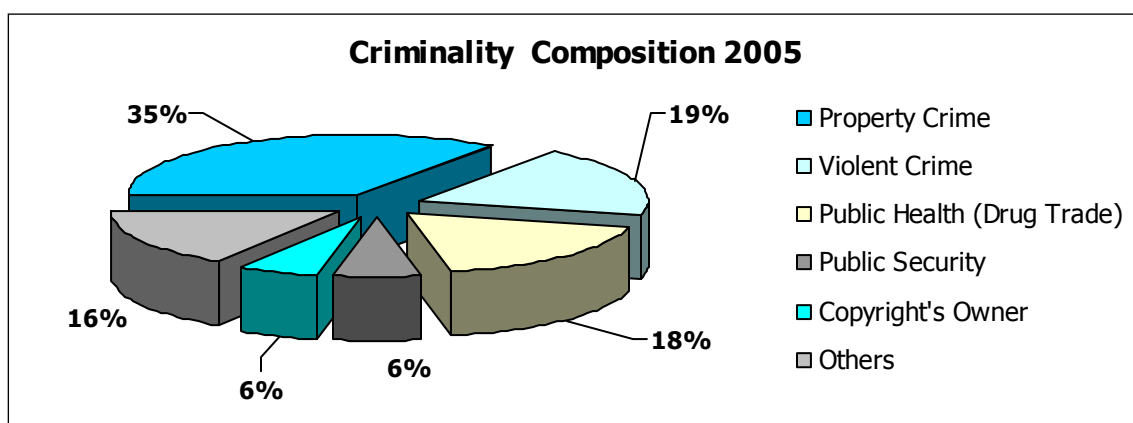

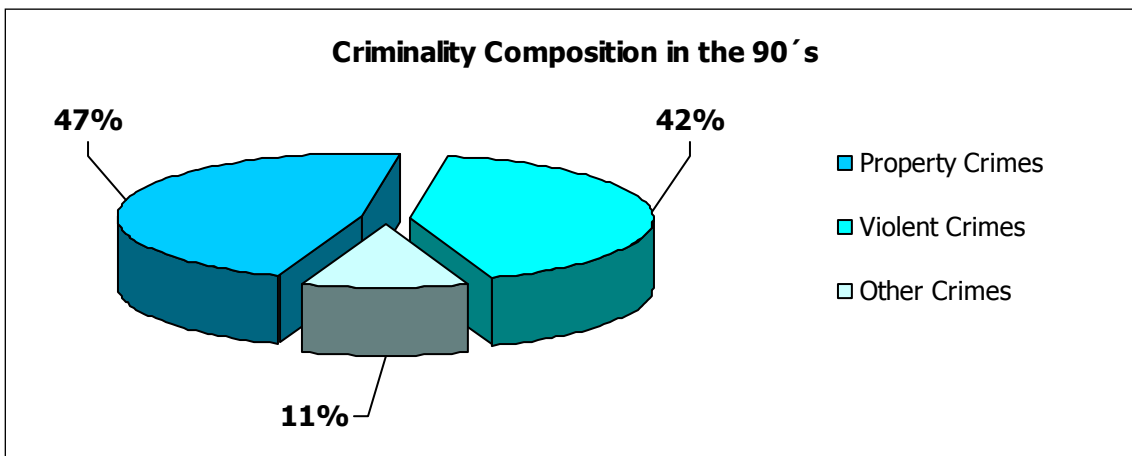

It is important to highlight the significant amount of cocaine that was seized during the months of May and August, 2005, reaching 18.304 and 12.725 kilos, respectively.

V. EXPROPRIATION

The Colombian National Police is also developing intensive operations in the field of expropriations. For instance, comparing the years 2004 and 2005, the sharp increase of 124% in the number of goods under investigation by the judiciary is obvious. This trend is similar in the case of the seized goods, which experienced an important increase of 52%.

CHANGES IN THE CRIMINALITY COMPOSITION

OFFENSES	2003	%	2004	%	2005	%
Violent crime	82.584	27%	69.209	23%	62.603	19%
Property crime	125.387	40.5%	116.173	38%	117.013	35%
Against The Public Security* (includes Firearms Traffic)	19.525	6.3%	19.703	6%	19.874	6%
Against Copyright's owner	7.078	2.2%	10.498	3%	19.427	6%
Against The Public Health (Especially drug trade)	35.133	11.3%	48.423	16%	61.312	18%
Others	40.458	13%	43.761	14%	53.495	16%
TOTAL	310.165	100%	307.767	100%	333.724	100%

The figures in the previous charts, showed a significant change in the criminality composition, with a reduction in the percentage of violent crimes, falling from 42% in the 90's, to 32%, 27%, 23% and 19% in 2002, 2003, 2004 and 2005 respectively. However, the offenses against the property continue having the highest percentage of participation of the total number of crimes, 38% and 35% during the years 2004 and

2005, respectively. Other crimes have had an increase in their percentage of participation, especially offenses against the Public Health and offenses against the Public Security with a 18% and 6% of participation in 2005, respectively, as a consequence of the higher incidence during the last 10 years, of drug and arms traffic, committed by self-defenses groups, subversives and other outlaw groups.

CONCLUSIONS

SOCIAL IMPACT OFFENSES COMPARISON

- ♦ This report shows an important success on violence reduction achieved by Colombian National Police, as follows:
- ♦ In 2005 Colombia reached the lowest homicide rate of 39 cases per 100.000 inhabitants, which had never been achieved before during the last 24 years, which equals to 18.111 cases. In 1981, the same rate of 2005 was recorded. However, the total number of cases reached 10.805 and the population at that time was of 29'080.0000 inhabitants. While the Colombian population grew 58%, the homicides rate remained constant.
- ♦ The favorable 10% reduction in the total homicides when comparing the 2005 data to 2004 equals to 2.099 less. However, this figure is more relevant when comparing the 2005 data with 2002, corresponding to a 37, 6% decrease or 10.856 lesser homicides, falling from 28.837 in 2002, to 18.111 ones in 2005.
- ♦ The amount of 28.837 homicides could be compared with the population of municipalities such as Abejorral (Antioquia), San Jacinto (Bolívar), Paipa (Boyacá), Salamina (Caldas) or La Calera (Cundinamarca), which would represent the extinction of those regions of the country.
- ♦ A reduction of 18% in Traffic Injuries, which could be explained due to the Road Accident Prevention Programs, implemented by the Police Departments through the Nation.
- ♦ Auto-thefts recorded a 20% decrease, falling from 12.411 cases to 9.954 cases in 2005, but we must point out the 45% reduction in this offense, when comparing the 17.303 Motor-Vehicle Thefts occurred in 2002 with the cases recorded in 2005. This achievement has been possible as a consequence of the increment in the number of municipalities protected by the National Police throughout the country, as well as the preventive and control actions taken against this crime.
- ♦ During 2005, there were 213 lesser cases of commercial cargo theft, which equals to a 23% reduction when comparing it with the 2004 data. The importance of this figure is noticeable when comparing the 1.436 cases reported in 2002 (721 more cases than those in 2005), this represents a remarkable decline of 50% regarding this offense.
- ♦ On the other hand, we must highlight the great success achieved by the National Police by reducing massive kidnapping (also known as "potluck fishing") and

extortion. The first one recorded a reduction of 55% which equals to 29 cases in 2005 or 36 lesser cases than those occurred in the previous year.

- ♦ It is important to stress the fact that during the last four years the total cases of kidnappings decreased 73%, while comparing the 2002 data with 2.986 cases to 800 cases in 2005.
- ♦ These achievements have been reached thanks to the current Democratic Defense and Security Police, and have created a favorable climate for foreign investment in Colombia.
- ♦ Fundamentally, it is being implemented through:
 - ♦ A vast network of informants whose identity is protected and who receive rewards for information leading to the detection and capture of illegal armed groups members.
 - ♦ Added protection for small towns, through a special force of "peasant soldiers" who provide surveillance and security in the areas where they live.
 - ♦ More security on the roads, through mobile units or fixed patrol posts supported by air surveillance.
- ♦ In regard to extortion, this crime also recorded a 26% reduction or 612 lesser cases when comparing to the 2004 data.
- ♦ The terrorist actions recorded a 16% decrease or 113 lesser cases than those occurred in 2005. These statistics become more significant when comparing the 2002 data with 1.645 cases of terrorism, to the 2005 data, with 611 cases, corresponding to a 63% decrease.

COLOMBIAN NATIONAL POLICE OPERATIONAL ACHIEVEMENTS

- ♦ **Illicit Drug Seizures:** It is important to emphasize about the Police efforts oriented towards the fight against drug trafficking, which have led to significant increments in the amount of illicit drugs seized, when comparing the years 2004 and 2005. Those increments were of 28 % for heroin, 23% for cocaine and 15% for coca base.
- ♦ **Total arrests:** This operational activity experienced an increase of 6%, reaching a total of 342.863 people arrested in 2005. Thus, the commitment of the National Police is evident in the fight against organized crime.

- ♦ Recovered and seized merchandise: There was an increase of 10%, in the total recovered merchandise, and a significant 36% rise, in the total seized merchandise.
- ♦ An increment in the national zones protected by the National Police, after having 168 municipalities without police presence in 2002, the goal of covering the total area of the nation was reached.
- ♦ The reduction of 19% in illegal coca crops during 2005, which equals to 33.762 hectares. This an important accomplishment if we take into account the fact that five years ago, in 2000, there were 160.000 hectares used for illegal crops, amount that equals to the area of Bogotá, D.C; this means, 1.600 square kilometers.
- ♦ An increase in the investment by the government in the National Ministry of Defense, which equaled to 2% of the GNP – Gross National Product- and rose to 5% in 2005.
- ♦ Another notorious accomplishment was the sharp increase of 114% in the number of goods under investigation by the District Attorney Office.
- ♦ Colombian National Police (CNP) is also developing intensive operations in the field of expropriations. For instance, comparing the years 2004 and 2005, the sharp increase of 124% in the number of goods under investigation by the District Attorney is obviously a demonstration of its effort. This trend is similar in the case of the seized goods, which experienced an important increase of 52%.
- ♦ All these CNP achievements have created a favorable climate among the citizens, who have recovered their confidence and credibility towards the government, National Police, and Military Forces. Some indicators that corroborate this statement are:
- ♦ The notorious boom of the tourist industry, with the largest amount of people registered in hotels located throughout the country. We must highlight the Caribbean cities in the North of Colombia such as Cartagena, Santa Marta, Barranquilla and the Municipalities of Tolú and Coveñas, among others; the “Eje Cafetero”, which is an important tourist region with coffee crop-raising, located in the Andes mountains and includes Manizales, Salamina, Aguadas, Quinchía; also, Villa de Leiva, located in Boyacá province, in the center of the country, with its colonial and picturesque architecture; Cali, located in the south-west of the country and it is characterized by traditional fairs and parties at the end of the year.

- ♦ At the airports nationwide, all the airlines recorded a high demand of tickets throughout the year, thanks to the increasing amount of passengers that were traveling to different cities and towns.
- ♦ The bus terminals also registered an increase in the number of departures of passengers during 2005, with different itineraries through the country, as a signal of confidence in the security of the Colombian roads. The annual average of passenger departures in Bogotá bus terminal from 1998 to 2002 was around 4'800.000, year in which it recorded a 37% increase reaching a total of 6'687.000 passenger departures in 2003. From 2002 onwards, the annual average of departures during 2004 and 2005 has remained over 9 million per year, which corroborates de statement previously mentioned.
